EQUITY STYLE BOX

INVESTMENT STYLE			MARKET CAPITALIZATION
Value	Blend	Growth	

Placement within the Morningstar Equity Style Box™ is based on two variables: relative median market capitalization and relative price valuations (price-to-book and price-to-earnings) of the Fund's portfolio holdings. These numbers are drawn from the Fund's portfolio holdings figures most recently entered into Morningstar's database and the corresponding market conditions.

INVESTMENT OBJECTIVE

Seeks to approximate, before fees and expenses, the total return of the Dow Jones Target 2020 Index.

TOTAL RETURNS	LAST THREE MONTHS	YEAR TO DATE	ANNUALIZED			
			ONE YEAR	THREE YEARS	FIVE YEARS	TEN YEARS
A Shares	1.81%	18.98%	18.98%	-0.39%	2.68%	1.32%

Figures quoted represent past performance, which is no guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance shown without sales charges would be lower if sales charges were reflected. Current performance may be lower or higher than the performance data quoted. Current month-end performance is available at the Funds' web site, www.wellsfargo.com/advantagefunds.

For Class A shares, the maximum front-end sales charge is 5.75%. For Class B shares, the maximum contingent deferred sales charge is 5.00%. For Class C shares, the maximum contingent deferred sales charge is 1.00%. Performance including sales charge assumes the sales charge for the corresponding time period.

The adviser has committed, through 6/30/2010, to waive fees and/or reimburse expenses to maintain the Fund's net expense ratio at 1.03% for Class A shares, 1.78% for Class B shares, and 1.78% for Class C shares. Without these reductions, the Fund's returns would have been lower. The Fund's gross expense ratio is 1.24% for Class A shares, 1.99% for Class B shares, and 1.99% for Class C shares.

GROWTH OF \$10,000 & ANNUAL RETURNS (A SHARES)

Does not include sales charges, and assumes reinvestment of dividends and capital gains. If sales charges were included, returns would be lower.

Wells Fargo Advantage Dow Jones Target 2020 Fund

INVESTMENT STRATEGY

- The Fund is a gateway fund that invests in various master portfolios, which in turn invest in a combination of equity, fixed income and money market securities to replicate the Dow Jones Target 2020 Index.

The target date represents the year in which investors may likely begin withdrawing assets. The Funds gradually seek to reduce market risk as the target date approaches and after it arrives by decreasing equity exposure and increasing fixed income exposure. The principal value is not guaranteed at any time, including at the target date. Stock values fluctuate in response to the activities of individual companies and general market and economic conditions. Bond values fluctuate in response to the financial condition of individual issuers, general market and economic conditions, and changes in interest rates. In general, when interest rates rise, bond values fall and investors may lose principal value. The use of derivatives may reduce returns and/or increase volatility. Active trading results in increased turnover and trading expenses and may generate higher short-term capital gains. Certain investment strategies tend to increase the total risk of an investment (relative to the broader market). This Fund is exposed to foreign investment risk, mortgage- and asset-backed securities risk, smaller company investment risk and allocation methodology risk (risk that the allocation methodology of the Dow Jones Target Date Index, whose total returns the Fund seeks to approximate, before fees and expenses, will not meet an investor's goals). Consult the Fund's prospectus for additional information on these and other risks.

The Wells Fargo Advantage Dow Jones Target 2020 Composite Benchmark is calculated using the actual holdings of the Wells Fargo Advantage Dow Jones Target 2020 Fund as reported in each Semi-Annual and Annual Report. The U.S. equity allocations are represented by the Russell 3000 Index (measures the performance of the 3,000 largest U.S. companies), the international equity allocations are represented by the MSCI EAFE Index (an unmanaged group of securities generally representative of the stock markets of Europe, Australasia and the Far East), the fixed income allocations are represented by the Barclays Capital 3-5 Year U.S. Treasury Index (contains public obligations of the U.S. Treasury with a remaining maturity of three to five years) and the cash allocations are represented by the 91-day T-Bill. After 7/1/2006, the Composite Benchmark consists solely of the Dow Jones Target 2020 Index. You cannot invest directly in an index.

(2) The Lipper Mixed-Asset Target 2020 Funds Average is an average of funds that seek to maximize assets for retirement or other purposes with an expected time horizon not to exceed the year 2020. The total return of the Lipper Average does not include the effect of sales charges. You cannot invest directly in a Lipper Average.

(3) The Dow Jones Target Date Indexes (each an "Index" or collectively the "Indexes") are a series of Indexes designed as benchmarks for multi-asset class portfolios with risk profiles that become more conservative over time. The Index weightings among the major asset classes are adjusted monthly based on a published set of Index rules. The Indexes with longer time horizons have higher allocations to equity securities, while the Indexes with shorter time horizons replace some of their stock allocations with allocations to fixed income securities and money market instruments. The Index returns reflect hypothetical back-tested performance. You cannot invest directly in an index.
