Small Cap Stock Funds

Prospectus

Classes A, B, C

Intrinsic Small Cap Value Fund

Class A - WFSMX; Class C - WSCDX

Small Cap Value Fund

Class A - SMVAX; Class B - SMVBX; Class C - SMVCX

Small/Mid Cap Value Fund

Class A - WFVAX; Class C - WFCVX

Special Small Cap Value Fund

Class A - ESPAX; Class B - ESPBX; Class C - ESPCX

Traditional Small Cap Growth Fund

Class A - EGWAX; Class C - EGWCX

**SUPPLEMENT TO THE PROSPECTUSES
OF
WELLS FARGO ADVANTAGE INCOME FUNDS
WELLS FARGO INTERNATIONAL EQUITY FUNDS
WELLS FARGO ADVANTAGE SMALL CAP STOCK FUNDS
(Each, a “Fund” and together, the “Funds”)**

The Funds’ prospectuses offering Class A, Class B and Class C shares are amended to include the following changes, effective as of the dates indicated below.

I. Exclusion of Systematic Transactions from Certain Waivers (Effective May 1, 2012)

The following sentence is added to the end of the 3rd bullet under the section “Reductions and Waivers of Sales Charges – Class A Shares Sales Charge Reductions and Waivers”:

Systematic transactions through the automatic investment plan, the automatic exchange plan and the systematic withdrawal plan are excluded from this provision.

II. Commission Waivers for Certain Share Purchases (Effective May 1, 2012)

In the section entitled “A Choice of Share Classes – Class A Sales Charge Schedule,” the phrase “...*unless the dealer of record waived its commission*” is deleted from the footnote to the table.

In the section “Reductions and Waivers of Sales Charges – CDSC Waivers,” the last two bullet points are removed and replaced with the following:

- We waive the Class C shares CDSC for redemptions by employer-sponsored retirement plans where the dealer of record waived its commission at the time of purchase.

III. Modification of NAV Privilege for Certain Former Evergreen Shareholders. (Effective July 31, 2012)

The privilege granted to former Evergreen shareholders of Class IS and Class R shares allowing them to purchase Class A shares of a Wells Fargo Advantage Fund at net asset value is modified so that it is now available solely to those shareholders whose shares are held directly with a Fund on or after July 31, 2012. Accordingly, the first two bullet points under “Class A Shares Sales Charge Waivers for Certain Parties” are replaced with the following:

- Former Evergreen Class IS shareholders who received Class A shares of a Fund as a result of a reorganization can continue to purchase Class A shares of that Fund and any other Wells Fargo Advantage Fund purchased subsequently by exchange at NAV, without paying the customary sales load, after which subsequent purchases of shares of the subsequent Fund may also be made at NAV, so long as such shares are held directly with the Fund on or after July 31, 2012.
- Former Evergreen Class R shareholders who received Class A shares of a Fund as a result of a reorganization can continue to purchase Class A shares of that Fund and any other Wells Fargo Advantage Fund purchased subsequently by exchange at NAV, without paying the customary sales load, after which subsequent purchases of shares of the subsequent Fund may also be made at NAV, so long as such shares are held directly with the Fund on or after July 31, 2012.

INTRINSIC SMALL CAP VALUE FUND

Investment Objective

The Fund seeks long-term capital appreciation.

Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the aggregate in specified classes of certain *Wells Fargo Advantage Funds*[®]. More information about these and other discounts is available from your financial professional and in "A Choice of Share Classes" and "Reductions and Waivers of Sales Charges" on pages 38 and 40 of the Prospectus and "Additional Purchase and Redemption Information" on page 49 of the Statement of Additional Information.

Shareholder Fees (fees paid directly from your investment)

	Class A	Class C
Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	5.75%	None
Maximum deferred sales charge (load) (as a percentage of offering price)	None ¹	1.00%

1. Investments of \$1 million or more are not subject to a front-end sales charge but will be subject to a deferred sales charge of 1.00% upon redemption within 18 months.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)¹

	Class A	Class C
Management Fees	0.80%	0.80%
Distribution (12b-1) Fees	0.00%	0.75%
Other Expenses	0.64%	0.64%
Acquired Fund Fees and Expenses	0.01%	0.01%
Total Annual Fund Operating Expenses	1.45%	2.20%
Fee Waivers	0.00%	0.00%
Total Annual Fund Operating Expenses After Fee Waiver²	1.45%	2.20%

- Expenses have been adjusted as necessary from amounts incurred during the Fund's most recent fiscal year to reflect current fees and expenses.
- The Adviser has committed through February 28, 2013 to waive fees and/or reimburse expenses to the extent necessary to cap the Fund's Total Annual Fund Operating Expenses After Fee Waiver, excluding certain expenses, at 1.45% for Class A and 2.20% for Class C. After this time, such cap may be changed or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other mutual funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that operating expenses remain the same as in the tables above. The example also assumes that the Total Annual Fund Operating Expenses After Fee Waiver shown above will only be in place for the length of the current waiver commitment. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Assuming Redemption at End of Period		Assuming No Redemption
After:	Class A	Class C	Class C
1 Year	\$714	\$323	\$223
3 Years	\$1,007	\$688	\$688
5 Years	\$1,322	\$1,180	\$1,180
10 Years	\$2,210	\$2,534	\$2,534

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 54% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, we invest at least 80% of the Fund's net assets (plus the amount of any borrowings for investment purposes, if any) in equity securities of small-capitalization companies, which we define as companies within the range of the Russell 2500™ Index at the time of purchase. The market capitalization range of the Russell 2500™ Index was \$76.4 million to \$7.4 billion, as of June 30, 2011, and is expected to change frequently.

We utilize a long-term focus that is intended to take advantage of investment opportunities presented by what we believe are short-term price anomalies in high-quality stocks. We seek to identify companies with established operating histories, financial strength and management expertise, among other factors. We seek stocks that are trading at a discount to what we believe are their estimated intrinsic values. Fundamental research is performed to identify securities for the portfolio with one or more catalysts present that will unlock the intrinsic value of the securities. These catalysts may include productive use of strong free cash flow, productivity gains, positive change in management or control, innovative or competitively superior products, increasing shareholder focus, or resolution of ancillary problems or misperceptions. We may sell a holding if the value potential is realized, if warning signs emerge of beginning fundamental deterioration or if the value is no longer compelling relative to the alternatives. We may invest in any sector, and at times we may emphasize one or more particular sectors.

Principal Investment Risks

An investment in the Fund is not a deposit of Wells Fargo Bank, N.A. or its affiliates and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

Issuer Risk. The value of a security may decline because of adverse events or circumstances that directly relate to conditions at the issuer or any entity providing it credit or liquidity support.

Liquidity Risk. A security may not be able to be sold at the time desired or without adversely affecting the price.

Management Risk. There is no guarantee of the Fund's performance or that the Fund will meet its objective. The market value of your investment may decline and you may suffer investment loss.

Market Risk. The market price of securities owned by the Fund may rapidly or unpredictably decline due to factors affecting securities markets generally or particular industries.

Regulatory Risk. Changes in government regulations may adversely affect the value of a security. An insufficiently regulated industry or market might also permit inappropriate practices that adversely affect an investment.

Sector Emphasis Risk. Investing a substantial portion of the Fund's assets in related industries or sectors may have greater risks because companies in these sectors may share common characteristics and may react similarly to market developments.

Smaller Company Securities Risk. Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than larger company stocks.

Value Style Investment Risk. Value stocks may lose value and may be subject to prolonged depressed valuations.

Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of an appropriate broad-based index(es). Past performance before and after taxes is no guarantee of future results. Current month-end performance is available on the Fund's Web site at wellsfargoadvantagefunds.com.

Calendar Year Total Returns for Class A as of 12/31 each year (Returns do not reflect sales charges and would be lower if they did)

Average Annual Total Returns for the periods ended 12/31/2011 (Returns reflect applicable sales charges)

	Inception Date of Share Class	1 Year	5 Year	Performance Since 3/28/2002
Class A (before taxes)	3/31/2008	-13.44%	-4.06%	6.21%
Class A (after taxes on distributions)	3/31/2008	-13.44%	-4.39%	5.26%
Class A (after taxes on distributions and the sale of Fund Shares)	3/31/2008	-8.73%	-3.49%	4.98%
Class C (before taxes)	3/31/2008	-9.83%	-3.62%	6.21%
Russell 2000® Value Index (reflects no deduction for fees, expenses, or taxes)		-5.50%	-1.87%	5.57%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state, local or foreign taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to tax-exempt investors or investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) Plans or Individual Retirement Accounts. After-tax returns are shown only for the Class A shares. After-tax returns for the Class C shares will vary.

In general, you can buy or sell shares of the Fund by mail, internet, phone or wire on any business day. You also may buy and sell shares through a financial professional.

Tax Information

Any distributions you receive from the Fund may be taxable as ordinary income or capital gains, except when your investment is in an IRA, 401(k) or other tax advantaged investment plan. You should consult your tax adviser about your specific tax situation.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase a Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Consult your salesperson or visit your financial intermediary's Web site for more information.

Investment Objective

The Fund seeks long-term capital appreciation.

Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the aggregate in specified classes of certain *Wells Fargo Advantage Funds*[®]. 3 Years	\$973	\$953	\$653	\$653	\$653
5 Years	\$1,265	\$1,322	\$1,122	\$1,122	\$1,122
10 Years	\$2,093	\$2,138	\$2,419	\$2,138	\$2,419

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 17% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, we invest at least 80% of the Fund's net assets in equity securities of small-capitalization companies, which we define as companies with market capitalizations within the range of the Russell 2500™ Index at the time of purchase. The market capitalization range of the Russell 2500™ Index was \$76.4 million to \$7.4 billion, as of June 30, 2011, and is expected to change frequently. We may also invest up to 30% of the Fund's total assets in equity securities of foreign issuers including ADRs and similar investments. As a hedging strategy, the Fund may write put and call options, meaning that the Fund sells an option to another party giving that party the right to either sell a stock to (put) or buy a stock from (call) the Fund at a predetermined price in the future. Whether or not this hedging strategy is successful depends on a variety of factors, particularly our ability to predict movements of the price of the hedged stock. Furthermore, we may use options to enhance return.

We employ a multi-faceted investment process that consists of quantitative idea generation and rigorous fundamental research. This process involves identifying companies that we believe exhibit attractive valuation characteristics and warrant further research. We then conduct fundamental research to find securities in small-capitalization companies with a positive dynamic for change that could move the price of such securities higher. The positive dynamic may include a change in management team, a new product or service, corporate restructuring, an improved business plan, a change in the regulatory environment, or the right time for the industry in its market cycle. We typically sell a security when its fundamentals deteriorate, its relative valuation versus the peer group and market becomes expensive, or for risk management considerations. We believe the combination of buying the securities of undervalued small-capitalization companies with positive dynamics for change limits our downside risk while allowing us to potentially participate in significant upside appreciation in the price of such securities.

Principal Investment Risks

An investment in the Fund is not a deposit of Wells Fargo Bank, N.A. or its affiliates and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

Counter-Party Risk. A Fund may incur a loss if the other party to an investment contract, such as a derivative or a repurchase or reverse repurchase agreement, fails to fulfill its contractual obligation to the Fund.

Derivatives Risk. The use of derivatives such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than offset risk.

Foreign Currency Transactions Risk. Foreign securities are often denominated in foreign currencies. As a result, the value of a Fund's shares is affected by changes in exchange rates. A Fund may enter into foreign currency futures contracts and foreign currency exchange contracts to manage this risk.

Foreign Investment Risk. Foreign investments face the potential of heightened illiquidity, greater price volatility and adverse effects of political, regulatory, tax, currency, economic or other macroeconomic developments.

Issuer Risk. The value of a security may decline because of adverse events or circumstances that directly relate to conditions at the issuer or any entity providing it credit or liquidity support.

Leverage Risk. Leverage created by borrowing or certain investments, such as derivatives and reverse repurchase agreements, can diminish the Fund's performance and increase the volatility of the Fund's net asset value.

Liquidity Risk. A security may not be able to be sold at the time desired or without adversely affecting the price.

Management Risk. There is no guarantee of the Fund's performance or that the Fund will meet its objective. The market value of your investment may decline and you may suffer investment loss.

Market Risk. The market price of securities owned by the Fund may rapidly or unpredictably decline due to factors affecting securities markets generally or particular industries.

Options Risk. An investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves. A Fund that purchases options is subject to the risk of a complete loss of premiums, while a Fund that writes options could be in a worse position than it would have been had it not written the option. There can be no assurance that a liquid market will exist when a Fund seeks to close out an option position.

Regulatory Risk. Changes in government regulations may adversely affect the value of a security. An insufficiently regulated industry or market might also permit inappropriate practices that adversely affect an investment.

Smaller Company Securities Risk. Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than larger company stocks.

Value Style Investment Risk. Value stocks may lose value and may be subject to prolonged depressed valuations.

Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of an appropriate broad-based index(es). Past performance before and after taxes is no guarantee of future results. 3 Years	\$996	\$676	\$676
5 Years	\$1,302	\$1,159	\$1,159
10 Years	\$2,169	\$2,493	\$2,493

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 34% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, we invest at least 80% of the Fund's net assets in equity securities of small- and medium-capitalization companies, which we define as companies with market capitalizations within the range of the Russell 2500™ Index at the time of purchase. The market capitalization range of the Russell 2500™ Index was \$76.4 million to \$7.4 billion, as of June 30, 2011, and is expected to change frequently. We may also invest up to 30% of the Fund's total assets in equity securities of foreign issuers through ADRs and similar investments. As a hedging strategy, the Fund may write put and call options, meaning that the Fund sells an option to another party giving that party the right to either sell a stock to (put) or buy a stock from (call) the Fund at a predetermined price in the future. Whether or not this hedging strategy is successful depends on a variety of factors, particularly our ability to predict movements of the price of the hedged stock. Furthermore, we may use options to enhance return.

We employ a multi-faceted investment process that consists of quantitative idea generation and rigorous fundamental research. This process involves identifying companies that we believe exhibit attractive valuation characteristics and warrant further research. We then conduct fundamental research to find securities in small- and medium-capitalization companies with a positive dynamic for change that could move the price of such securities higher. The positive dynamic may include a change in management team, a new product or service, corporate restructuring, an improved business plan, a change in the regulatory environment, or the right time for the industry in its market cycle. We typically sell a security when its fundamentals deteriorate, its relative valuation versus the peer group and market becomes expensive, or for risk management considerations. We believe the combination of buying the securities of undervalued small and medium capitalization companies with positive dynamics for change limits our downside risk while allowing us to potentially participate in significant upside appreciation in the price of such securities.

Principal Investment Risks

An investment in the Fund is not a deposit of Wells Fargo Bank, N.A. or its affiliates and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

Counter-Party Risk. A Fund may incur a loss if the other party to an investment contract, such as a derivative or a repurchase or reverse repurchase agreement, fails to fulfill its contractual obligation to the Fund.

Derivatives Risk. The use of derivatives such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than offset risk.

Foreign Investment Risk. Foreign investments face the potential of heightened illiquidity, greater price volatility and adverse effects of political, regulatory, tax, currency, economic or other macroeconomic developments.

Issuer Risk. The value of a security may decline because of adverse events or circumstances that directly relate to conditions at the issuer or any entity providing it credit or liquidity support.

Leverage Risk. Leverage created by borrowing or certain investments, such as derivatives and reverse repurchase agreements, can diminish the Fund's performance and increase the volatility of the Fund's net asset value.

Liquidity Risk. A security may not be able to be sold at the time desired or without adversely affecting the price.

Management Risk. There is no guarantee of the Fund's performance or that the Fund will meet its objective. The market value of your investment may decline and you may suffer investment loss.

Market Risk. The market price of securities owned by the Fund may rapidly or unpredictably decline due to factors affecting securities markets generally or particular industries.

Options Risk. An investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves. A Fund that purchases options is subject to the risk of a complete loss of premiums, while a Fund that writes options could be in a worse position than it would have been had it not written the option. There can be no assurance that a liquid market will exist when a Fund seeks to close out an option position.

Regulatory Risk. Changes in government regulations may adversely affect the value of a security. An insufficiently regulated industry or market might also permit inappropriate practices that adversely affect an investment.

Smaller Company Securities Risk. Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than larger company stocks.

Value Style Investment Risk. Value stocks may lose value and may be subject to prolonged depressed valuations.

Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of an appropriate broad-based index(es). Past performance before and after taxes is no guarantee of future results. Current month-end performance is available on the Fund's Web site at wellsfargoadvantagefunds.com.

Calendar Year Total Returns for Class A as of 12/31 each year (Returns do not reflect sales charges and would be lower if they did)

Average Annual Total Returns for the periods ended 12/31/2011 (Returns reflect applicable sales charges)

	Inception Date of Share Class	1 Year	5 Year	Performance Since 3/28/2002
Class A (before taxes)	7/31/2007	-13.87%	-1.79%	5.48%
Class A (after taxes on distributions)	7/31/2007	-13.93%	-2.21%	5.05%
Class A (after taxes on distributions and the sale of Fund Shares)	7/31/2007	-8.95%	-1.57%	4.71%
Class C (before taxes)	7/31/2007	-10.37%	-1.35%	5.53%
Russell 2500™ Value Index (reflects no deduction for fees, expenses, or taxes)		-3.36%	-0.58%	6.45%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state, local or foreign taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to tax-exempt investors or investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) Plans or Individual Retirement Accounts. After-tax returns are shown only for the Class A shares. After-tax returns for the Class C shares will vary.

Wells Fargo Funds Management, LLC	Wells Capital Management Incorporated	I. Charles Rinaldi , Portfolio Manager / 1997 Erik C. Astheimer , Portfolio Manager / 2008 Michael Schneider, CFA , Portfolio Manager / 2008

Transaction Policies

Buying Fund Shares	To Place Orders or Redeem Shares
Minimum Initial Investment Class A and Class C: \$1,000	Mail: <i>Wells Fargo Advantage Funds</i> P.O. Box 8266 Boston, MA 02266-8266
Minimum Additional Investment All Classes: \$100	Internet: wellsfargoadvantagefunds.com Phone or Wire: 1-800-222-8222
	Contact your financial professional.

In general, you can buy or sell shares of the Fund by mail, internet, phone or wire on any business day. You also may buy and sell shares through a financial professional.

Tax Information

Any distributions you receive from the Fund may be taxable as ordinary income or capital gains, except when your investment is in an IRA, 401(k) or other tax advantaged investment plan. You should consult your tax adviser about your specific tax situation.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase a Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Consult your salesperson or visit your financial intermediary's Web site for more information.

Investment Objective

The Fund seeks long-term capital appreciation.

Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the aggregate in specified classes of certain *Wells Fargo Advantage Funds*[®]. More information about these and other discounts is available from your financial professional and in "A Choice of Share Classes" and "Reductions and Waivers of Sales Charges" on pages 38 and 40 of the Prospectus and "Additional Purchase and Redemption Information" on page 49 of the Statement of Additional Information.

Shareholder Fees (fees paid directly from your investment)

	Class A	Class B	Class C
Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	5.75%	None	None
Maximum deferred sales charge (load) (as a percentage of offering price)	None ¹	5.00%	1.00%

1. Investments of \$1 million or more are not subject to a front-end sales charge but will be subject to a deferred sales charge of 1.00% upon redemption within 18 months.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)¹

	Class A	Class B	Class C
Management Fees	0.79%	0.79%	0.79%
Distribution (12b-1) Fees	0.00%	0.75%	0.75%
Other Expenses	0.59%	0.59%	0.59%
Acquired Fund Fees and Expenses	0.01%	0.01%	0.01%
Total Annual Fund Operating Expenses	1.39%	2.14%	2.14%
Fee Waivers	0.04%	0.04%	0.04%
Total Annual Fund Operating Expenses After Fee Waiver²	1.35%	2.10%	2.10%

- Expenses have been adjusted as necessary from amounts incurred during the Fund's most recent fiscal year to reflect current fees and expenses.
- The Adviser has committed through July 18, 2013 to waive fees and/or reimburse expenses to the extent necessary to cap the Fund's Total Annual Fund Operating Expenses After Fee Waiver, excluding certain expenses, at 1.34% for Class A, 2.09% for Class B, and 2.09% for Class C. After this time, such cap may be changed or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other mutual funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that operating expenses remain the same as in the tables above. The example also assumes that the Total Annual Fund Operating Expenses After Fee Waiver shown above will only be in place for the length of the current waiver commitment. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

After:	Assuming Redemption at End of Period			Assuming No Redemption	
	Class A	Class B	Class C	Class B	Class C
1 Year	\$705	\$713	\$313	\$213	\$213
3 Years	\$986	\$966	\$666	\$666	\$666
5 Years	\$1,288	\$1,346	\$1,146	\$1,146	\$1,146
10 Years	\$2,144	\$2,189	\$2,469	\$2,189	\$2,469

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example,

affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 54% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, we invest at least 80% of the Fund's net assets in equity securities of small-capitalization companies, which we define as companies with market capitalizations within the range of the Russell 2000® Index at the time of purchase. The market capitalization range of the Russell 2000® Index was \$76.4 million to \$3.1 billion, as of June 30, 2011, and is expected to change frequently.

We look for significantly undervalued companies that we believe have the potential for above average capital growth with below average risk. Rigorous fundamental research drives our search for undervalued, high quality companies; which we define as industry leaders with strong balance sheets and superior cash flows. We utilize quantitative screens to narrow the investment universe by assessing companies' financial statement strength and looking for high cash flows and low financial leverage. Through detailed qualitative research we then identify stocks valued below their estimated intrinsic value with hidden opportunities for above-average appreciation. Typical investments include stocks of companies that have low price-to-earnings ratios, are generally out of favor in the marketplace, are selling significantly below their stated or replacement book value or are undergoing a reorganization or other corporate action that may create above-average price appreciation. We regularly review the investments of the portfolio and may sell a portfolio holding when a stock's price nears its intrinsic value appreciation target, the macro environment becomes unfavorable, short-term downside risks increase, the company's fundamentals have deteriorated or we identify a more attractive investment opportunity.

Principal Investment Risks

An investment in the Fund is not a deposit of Wells Fargo Bank, N.A. or its affiliates and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

Issuer Risk. The value of a security may decline because of adverse events or circumstances that directly relate to conditions at the issuer or any entity providing it credit or liquidity support.

Liquidity Risk. A security may not be able to be sold at the time desired or without adversely affecting the price.

Management Risk. There is no guarantee of the Fund's performance or that the Fund will meet its objective. The market value of your investment may decline and you may suffer investment loss.

Market Risk. The market price of securities owned by the Fund may rapidly or unpredictably decline due to factors affecting securities markets generally or particular industries.

Regulatory Risk. Changes in government regulations may adversely affect the value of a security. An insufficiently regulated industry or market might also permit inappropriate practices that adversely affect an investment.

Smaller Company Securities Risk. Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than larger company stocks.

Value Style Investment Risk. Value stocks may lose value and may be subject to prolonged depressed valuations.

Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of an appropriate broad-based index(es). Past performance before and after taxes is no guarantee of future results. Current month-end performance is available on the Fund's Web site at wellsfargoadvantagefunds.com.

Calendar Year Total Returns as of 12/31 each year Class A (Returns do not reflect sales charges and would be lower if they did)

TRADITIONAL SMALL CAP GROWTH FUND

Investment Objective

The Fund seeks long-term capital appreciation.

Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the aggregate in specified classes of certain *Wells Fargo Advantage Funds*[®]. More information about these and other discounts is available from your financial professional and in "A Choice of Share Classes" and "Reductions and Waivers of Sales Charges" on pages 38 and 40 of the Prospectus and "Additional Purchase and Redemption Information" on page 49 of the Statement of Additional Information.

Shareholder Fees (fees paid directly from your investment)

	Class A	Class C
Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	5.75%	None
Maximum deferred sales charge (load) (as a percentage of offering price)	None ¹	1.00%

1. Investments of \$1 million or more are not subject to a front-end sales charge but will be subject to a deferred sales charge of 1.00% upon redemption within 18 months.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C
Management Fees	0.80%	0.80%
Distribution (12b-1) Fees	0.00%	0.75%
Other Expenses	0.63%	0.63%
Total Annual Fund Operating Expenses	1.43%	2.18%
Fee Waivers	0.10%	0.10%
Total Annual Fund Operating Expenses After Fee Waiver¹	1.33%	2.08%

1. The Adviser has committed through July 18, 2013 to waive fees and/or reimburse expenses to the extent necessary to cap the Fund's Total Annual Fund Operating Expenses After Fee Waiver, excluding certain expenses, at the amount shown above. After this time, such cap may be changed or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other mutual funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that operating expenses remain the same as in the tables above. The example also assumes that the Total Annual Fund Operating Expenses After Fee Waiver shown above will only be in place for the length of the current waiver commitment. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

After:	Assuming Redemption at End of Period		Assuming No Redemption
	Class A	Class C	Class C
1 Year	\$703	\$311	\$211
3 Years	\$992	\$673	\$673
5 Years	\$1,303	\$1,160	\$1,160
10 Years	\$2,181	\$2,506	\$2,506

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 123% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, we invest at least 80% of the Fund's net assets in equity securities of small-capitalization companies, which we define as companies with market capitalizations within the range of the Russell 2000® Index at the time of purchase. The market capitalization range of the Russell 2000® Index was \$76.4 million to \$3.1 billion, as of June 30, 2011, and is expected to change frequently.

The core of our research process is the rigorous analysis of each portfolio candidate to identify superior opportunities in each of three categories: First, we develop a strong multi-year investment thesis for each company. Next, we identify catalysts that will drive long-term sustainable earnings growth in excess of current market expectations. Lastly, we look for attractive valuations that do not fully reflect the company's long term growth potential. Once each of these three categories is satisfied (thesis, catalysts, and valuation), a company is added to the portfolio. We sell stocks if our thesis or valuation is fully reflected in the stock price, if we recognize deterioration in thesis or a change in catalysts, or if an alternate stock with superior attributes has been identified.

Principal Investment Risks

An investment in the Fund is not a deposit of Wells Fargo Bank, N.A. or its affiliates and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

Growth Style Investment Risk. Growth stocks may be more expensive relative to the values of other stocks and carry potential for significant volatility and loss.

Issuer Risk. The value of a security may decline because of adverse events or circumstances that directly relate to conditions at the issuer or any entity providing it credit or liquidity support.

Liquidity Risk. A security may not be able to be sold at the time desired or without adversely affecting the price.

Management Risk. There is no guarantee of the Fund's performance or that the Fund will meet its objective. The market value of your investment may decline and you may suffer investment loss.

Market Risk. The market price of securities owned by the Fund may rapidly or unpredictably decline due to factors affecting securities markets generally or particular industries.

Regulatory Risk. Changes in government regulations may adversely affect the value of a security. An insufficiently regulated industry or market might also permit inappropriate practices that adversely affect an investment.

Smaller Company Securities Risk. Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than larger company stocks.

Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of an appropriate broad-based index(es). Past performance before and after taxes is no guarantee of future results. Current month-end performance is available on the Fund's Web site at wellsfargoadvantagefunds.com.

Calendar Year Total Returns for Class A as of 12/31 each year (Returns do not reflect sales charges and would be lower if they did)

Average Annual Total Returns for the periods ended 12/31/2011 (Returns reflect applicable sales charges)

	Inception Date of Share Class	1 Year	5 Year	10 Year
Class A (before taxes)	6/5/1995	-10.52%	0.66%	3.41%
Class A (after taxes on distributions)	6/5/1995	-10.52%	0.17%	2.79%
Class A (after taxes on distributions and the sale of Fund Shares)	6/5/1995	-6.84%	0.56%	2.90%
Class C (before taxes)	7/30/2010	-6.75%	1.11%	3.26%
Russell 2000® Growth Index (reflects no deduction for fees, expenses, or taxes)		-2.91%	2.09%	4.48%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state, local or foreign taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to tax-exempt investors or investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) Plans or Individual Retirement Accounts. After-tax returns are shown only for the Class A shares. After-tax returns for the Class C shares will vary.

In general, you can buy or sell shares of the Fund by mail, internet, phone or wire on any business day. You also may buy and sell shares through a financial professional.

Tax Information

Any distributions you receive from the Fund may be taxable as ordinary income or capital gains, except when your investment is in an IRA, 401(k) or other tax advantaged investment plan. You should consult your tax adviser about your specific tax situation.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase a Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Consult your salesperson or visit your financial intermediary's Web site for more information.

Key Fund Information

This Prospectus contains information about certain Funds within the *Wells Fargo Advantage Funds*[®] family and is designed to provide you with important information to help you with your investment decisions. Please read it carefully and keep it for future reference.

In this Prospectus, "we" generally refers to Wells Fargo Funds Management, LLC (Funds Management), the sub-adviser, or the portfolio managers. "We" may also refer to the Funds' other service providers. "You" refers to the shareholder or potential investor.

Investment Objective, Principal Investments and Principal Investment Strategies

The investment objective of each Fund in this Prospectus is non-fundamental; that is, it can be changed by a vote of the Board of Trustees alone. The objective and strategies description for each Fund tells you:

- what the Fund is trying to achieve;
- how we intend to invest your money; and
- what makes the Fund different from the other Funds offered in this Prospectus.

This section also provides a summary of each Fund's principal investment and policies and practices. Unless otherwise indicated, these investment policies and practices apply on an ongoing basis. Percentages of "the Fund's net assets" are measured as percentages of net assets plus borrowings for investment purposes. The investment policy of the Funds concerning "80% of the Fund's net assets" may be changed by the Board of Trustees without shareholder approval, but shareholders would be given at least 60 days notice.

Principal Risk Factors

This section lists the principal risk factors for each Fund. A complete description of these and other risks is found in the "Description of Principal Investment Risks" section. It is possible to lose money by investing in a Fund.

Intrinsic Small Cap Value Fund

Adviser	Wells Fargo Funds Management, LLC	
Sub-Adviser	Metropolitan West Capital Management, LLC	
Portfolio Managers	Samir Sikka Alex Alvarez, CFA	
Fund Inception:	March 28, 2002	
Class A	Ticker: WFSMX	Fund Number: 3327
Class C	Ticker: WSCDX	Fund Number: 3542

Investment Objective

The Fund seeks long-term capital appreciation.

The Fund's Board of Trustees can change this investment objective without a shareholder vote.

Principal Investments

Under normal circumstances, we invest:

- at least 80% of the Fund's net assets (plus the amount of any borrowings for investment purposes, if any) in equity securities of small-capitalization companies.

Principal Investment Strategies

Under normal circumstances, we invest at least 80% of the Fund's net assets (plus the amount of any borrowings for investment purposes, if any) in equity securities of small-capitalization companies, which we define as companies within the range of the Russell 2500™ Index at the time of purchase. The market capitalization range of the Russell 2500™ Index was \$76.4 million to \$7.4 billion, as of June 30, 2011, and is expected to change frequently.

We utilize a long-term focus that is intended to take advantage of investment opportunities presented by what we believe are short-term price anomalies in high-quality stocks. We seek to identify companies with established operating histories, financial strength and management expertise, among other factors. We seek stocks that are trading at a discount to what we believe are their estimated intrinsic values. Fundamental research is performed to identify securities for the portfolio with one or more catalysts present that will unlock the intrinsic value of the securities. These catalysts may include productive use of strong free cash flow, productivity gains, positive change in management or control, innovative or competitively superior products, increasing shareholder focus, or resolution of ancillary problems or misperceptions. We may sell a holding if the value potential is realized, if warning signs emerge of beginning fundamental deterioration or if the value is no longer compelling relative to the alternatives. We may invest in any sector, and at times we may emphasize one or more particular sectors.

The Fund may hold some of its assets in cash or in money market instruments, including U.S. Government obligations, shares of other mutual funds and repurchase agreements, or make other short-term investments to either maintain liquidity or for short-term defensive purposes when we believe it is in the best interests of the shareholders to do so. During these periods, the Fund may not achieve its objective.

We may actively trade portfolio securities, which may lead to higher transaction costs that may affect the Fund's performance. In addition, active trading of portfolio securities may lead to higher taxes if your shares are held in a taxable account.

Principal Risk Factors

The Fund is primarily subject to the risks mentioned below.

- Issuer Risk
- Liquidity Risk
- Management Risk
- Market Risk
- Regulatory Risk
- Sector Emphasis Risk
- Smaller Company Securities Risk
- Value Style Investment Risk

These and other risks could cause you to lose money in your investment in the Fund and could adversely affect the Fund's net asset value and total return. These risks are described in the "Description of Principal Investment Risks" section.

Small Cap Value Fund

Adviser	Wells Fargo Funds Management, LLC	
Sub-Adviser	Wells Capital Management Incorporated	
Portfolio Managers	I. Charles Rinaldi Erik C. Astheimer Michael Schneider, CFA	
Fund Inception:	December 31, 1997	
Class A	Ticker: SMVAX	Fund Number: 3306
Class B	Ticker: SMVBX	Fund Number: 3408
Class C	Ticker: SMVCX	Fund Number: 3515

Investment Objective

The Fund seeks long-term capital appreciation.

The Fund's Board of Trustees can change this investment objective without a shareholder vote.

Principal Investments

Under normal circumstances, we invest:

- at least 80% of the Fund's net assets in equity securities of small-capitalization companies; and
- up to 30% of the Fund's total assets in equity securities of foreign issuers, including ADRs and similar investments.

Principal Investment Strategies

We invest principally in equity securities of small-capitalization companies, which we define as companies with market capitalizations within the range of the Russell 2500™ Index at the time of purchase. The market capitalization range of the Russell 2500™ Index was \$76.4 million to \$7.4 billion, as of June 30, 2011, and is expected to change frequently. We may also invest in equity securities of foreign issuers including ADRs and similar investments. As a hedging strategy, the Fund may write put and call options, meaning that the Fund sells an option to another party giving that party the right to either sell a stock to (put) or buy a stock from (call) the Fund at a predetermined price in the future. Whether or not this hedging strategy is successful depends on a variety of factors, particularly our ability to predict movements of the price of the hedged stock. Furthermore, we may use options to enhance return.

We employ a multi-faceted investment process that consists of quantitative idea generation and rigorous fundamental research. This process involves identifying companies that we believe exhibit attractive valuation characteristics and warrant further research. We then conduct fundamental research to find securities in small-capitalization companies with a positive dynamic for change that could move the price of such securities higher. The positive dynamic may include a change in management team, a new product or service, corporate restructuring, an improved business plan, a change in the regulatory environment, or the right time for the industry in its market cycle. We typically sell a security when its fundamentals deteriorate, its relative valuation versus the peer group and market becomes expensive, or for risk management considerations. We believe the combination of buying the securities of undervalued small-capitalization companies with positive dynamics for change limits our downside risk while allowing us to potentially participate in significant upside appreciation in the price of such securities.

The Fund may hold some of its assets in cash or in money market instruments, including U.S. Government obligations, shares of other mutual funds and repurchase agreements, or make other short-term investments to either maintain liquidity or for short-term defensive purposes when we believe it is in the best interests of the shareholders to do so. During these periods, the Fund may not achieve its objective.

We may actively trade portfolio securities, which may lead to higher transaction costs that may affect the Fund's performance. In addition, active trading of portfolio securities may lead to higher taxes if your shares are held in a taxable account.

Principal Risk Factors

The Fund is primarily subject to the risks mentioned below.

- Counter-Party Risk
- Derivatives Risk
- Foreign Currency Transaction Risk
- Foreign Investment Risk
- Issuer Risk
- Leverage Risk
- Liquidity Risk
- Management Risk
- Market Risk
- Options Risk
- Regulatory Risk
- Smaller Company Securities Risk
- Value Style Investment Risk

These and other risks could cause you to lose money in your investment in the Fund and could adversely affect the Fund's net asset value and total return. These risks are described in the "Description of Principal Investment Risks" section.

Small/Mid Cap Value Fund

Adviser	Wells Fargo Funds Management, LLC	
Sub-Adviser	Wells Capital Management Incorporated	
Portfolio Managers	I. Charles Rinaldi Erik C. Astheimer Michael Schneider, CFA	
Fund Inception:	March 28, 2002	
Class A	Ticker: Wfvax	Fund Number: 3324
Class C	Ticker: Wfcvx	Fund Number: 3530

Investment Objective

The Fund seeks long-term capital appreciation.

The Fund's Board of Trustees can change this investment objective without a shareholder vote.

Principal Investments

Under normal circumstances, we invest:

- at least 80% of the Fund's net assets in equity securities of small- and medium-capitalization companies; and
- up to 30% of the Fund's total assets in equity securities of foreign issuers, including ADRs and similar investments.

Principal Investment Strategies

We invest principally in equity securities of small- and medium capitalization companies, which we define as companies with market capitalizations within the range of the Russell 2500™ Index at the time of purchase. The market capitalization range of the Russell 2500™ Index was \$76.4 million to \$7.4 billion, as of June 30, 2011, and is expected to change frequently. We may also invest in equity securities of foreign issuers through ADRs and similar investments. As a hedging strategy, the Fund may write put and call options, meaning that the Fund sells an option to another party giving that party the right to either sell a stock to (put) or buy a stock from (call) the Fund at a predetermined price in the future. Whether or not this hedging strategy is successful depends on a variety of factors, particularly our ability to predict movements of the price of the hedged stock. Furthermore, we may use options to enhance return.

We employ a multi-faceted investment process that consists of quantitative idea generation and rigorous fundamental research. This process involves identifying companies that we believe exhibit attractive valuation characteristics and warrant further research. We then conduct fundamental research to find securities in small- and medium-capitalization companies with a positive dynamic for change that could move the price of such securities higher. The positive dynamic may include a change in management team, a new product or service, corporate restructuring, an improved business plan, a change in the regulatory environment, or the right time for the industry in its market cycle. We typically sell a security when its fundamentals deteriorate, its relative valuation versus the peer group and market becomes expensive, or for risk management considerations. We believe the combination of buying the securities of undervalued small and medium capitalization companies with positive dynamics for change limits our downside risk while allowing us to potentially participate in significant upside appreciation in the price of such securities.

The Fund may hold some of its assets in cash or in money market instruments, including U.S. Government obligations, shares of other mutual funds and repurchase agreements, or make other short-term investments to either maintain liquidity or for short-term defensive purposes when we believe it is in the best interest of the shareholders to do so. During these periods, the Fund may not achieve its objective.

We may actively trade portfolio securities, which may lead to higher transaction costs that may affect the Fund's performance. In addition, active trading of portfolio securities may lead to higher taxes if your shares are held in a taxable account.

Principal Risk Factors

The Fund is primarily subject to the risks mentioned below.

- Counter-Party Risk
- Derivatives Risk
- Foreign Investment Risk
- Issuer Risk
- Leverage Risk
- Liquidity Risk
- Management Risk
- Market Risk
- Options Risk
- Regulatory Risk
- Smaller Company Securities Risk
- Value Style Investment Risk

These and other risks could cause you to lose money in your investment in the Fund and could adversely affect the Fund's net asset value and total return. These risks are described in the "Description of Principal Investment Risks" section.

Special Small Cap Value Fund

Adviser	Wells Fargo Funds Management, LLC	
Sub-Adviser	Wells Capital Management Incorporated	
Portfolio Managers	James M. Tringas, CFA, CPA Robert Rifkin, CFA	
Fund Inception	May 7, 1993	
Class A	Ticker: ESPAX	Fund Number: 637
Class B	Ticker: ESPBX	Fund Number: 837
Class C	Ticker: ESPCX	Fund Number: 4511

Investment Objective

The Fund seeks long-term capital appreciation.

The Fund's Board of Trustees can change this investment objective without a shareholder vote.

Principal Investments

Under normal circumstances, we invest:

- at least 80% of the Fund's net assets in equity securities of small-capitalization companies.

Principal Investment Strategies

We invest principally in equity securities of small-capitalization companies, which we define as companies with market capitalizations within the range of the Russell 2000[®] Index at the time of purchase. The market capitalization range of the Russell 2000[®] Index was \$76.4 million to \$7.4 billion, as of June 30, 2011, and is expected to change frequently.

We look for significantly undervalued companies that we believe have the potential for above average capital growth with below average risk. Rigorous fundamental research drives our search for undervalued, high quality companies; which we define as industry leaders with strong balance sheets and superior cash flows. We utilize quantitative screens to narrow the investment universe by assessing companies' financial statement strength and looking for high cash flows and low financial leverage. Through detailed qualitative research we then identify stocks valued below their estimated intrinsic value with hidden opportunities for above-average appreciation. Typical investments include stocks of companies that have low price-to-earnings ratios, are generally out of favor in the marketplace, are selling significantly below their stated or replacement book value or are undergoing a reorganization or other corporate action that may create above-average price appreciation. We regularly review the investments of the portfolio and may sell a portfolio holding when a stock's price nears its intrinsic value appreciation target, the macro environment becomes unfavorable, short-term downside risks increase, the company's fundamentals have deteriorated or we identify a more attractive investment opportunity.

The Fund may hold some of its assets in cash or in money market instruments, including U.S. Government obligations, shares of other mutual funds and repurchase agreements, or make other short-term investments to either maintain liquidity or for short-term defensive purposes when we believe it is in the best interests of the shareholders to do so. During these periods, the Fund may not achieve its objective.

We may actively trade portfolio securities, which may lead to higher transaction costs that may affect the Fund's performance. In addition, active trading of portfolio securities may lead to higher taxes if your shares are held in a taxable account.

Principal Risk Factors

The Fund is primarily subject to the risks mentioned below.

- Issuer Risk
- Liquidity Risk
- Management Risk
- Market Risk
- Regulatory Risk
- Smaller Company Securities Risk
- Value Style Investment Risk

These and other risks could cause you to lose money in your investment in the Fund and could adversely affect the Fund's net asset value and total return. These risks are described in the "Description of Principal Investment Risks" section.

Traditional Small Cap Growth Fund

Adviser	Wells Fargo Funds Management, LLC	
Sub-Adviser	Wells Capital Management Incorporated	
Portfolio Managers	Paul Carder, CFA Jeffrey S. Drummond, CFA Linda Freeman, CFA Jeffrey Harrison, CFA	
Fund Inception	April 15, 1985	
Class A	Ticker: EGWAX	Fund Number: 4308
Class C	Ticker: EGWCX	Fund Number: 3551

Investment Objective

The Fund seeks long-term capital appreciation.

The Fund's Board of Trustees can change this investment objective without a shareholder vote.

Principal Investments

Under normal circumstances, we invest:

- at least 80% of the Fund's net assets in equity securities of small-capitalization companies.

Principal Investment Strategies

We invest principally in equity securities of small-capitalization companies, which we define as companies with market capitalizations, at the time of purchase, within the range of the Russell 2000[®] Index at the time of purchase. The market capitalization range of the Russell 2000[®] Index was \$76.4 million to \$3.1 billion, as of June 30, 2011, and is expected to change frequently.

The core of our research process is the rigorous analysis of each portfolio candidate to identify superior opportunities in each of three categories: First, we develop a strong multi-year investment thesis for each company. Next, we identify catalysts that will drive long-term sustainable earnings growth in excess of current market expectations. Lastly, we look for attractive valuations that do not fully reflect the company's long term growth potential. Once each of these three categories is satisfied (thesis, catalysts, and valuation), a company is added to the portfolio. We sell stocks if our thesis or valuation is fully reflected in the stock price, if we recognize deterioration in thesis or a change in catalysts, or if an alternate stock with superior attributes has been identified.

The Fund may hold some of its assets in cash or in money market instruments, including U.S. Government obligations, shares of other mutual funds and repurchase agreements, or make other short-term investments to either maintain liquidity or for short-term defensive purposes when we believe it is in the best interests of the shareholders to do so. We may actively trade portfolio securities, which may lead to higher transaction costs that may affect the Fund's performance. In addition, active trading of portfolio securities may lead to higher taxes if your shares are held in a taxable account.

Principal Risk Factors

The Fund is primarily subject to the risks mentioned below.

- Growth Style Investment Risk
- Issuer Risk
- Liquidity Risk
- Management Risk
- Market Risk
- Regulatory Risk
- Smaller Company Securities Risk

These and other risks could cause you to lose money in your investment in the Fund and could adversely affect the Fund's net asset value and total return. These risks are described in the "Description of Principal Investment Risks" section.

Description of Principal Investment Risks

Understanding the risks involved in mutual fund investing will help you make an informed decision that takes into account your risk tolerance and preferences. The factors that are most likely to have a material effect on a particular Fund as a whole are called "principal risks." The principal risks for each Fund have been previously identified and are described below. Additional information about the principal risks is included in the Statement of Additional Information.

Counter-Party Risk

When a Fund enters into an investment contract, such as a derivative or a repurchase or reverse repurchase agreement, the Fund is exposed to the risk that the other party will not fulfill its contractual obligations. For example, in a repurchase agreement, there exists the risk that where the Fund buys a security from a seller that agrees to repurchase the security at an agreed upon price and time, the seller will not repurchase the security. Similarly, the Fund is exposed to counter-party risk if it engages in a reverse repurchase agreement where a broker-dealer agrees to buy securities and the Fund agrees to repurchase them at a later date.

Derivatives Risk

The term "derivatives" covers a broad range of investments, including futures, options and swap agreements. In general, a derivative refers to any financial instrument whose value is derived, at least in part, from the price of another security or a specified index, asset or rate. The use of derivatives presents risks different from, and possibly greater than, the risks associated with investing directly in traditional securities. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the derivatives. These risks are heightened when the portfolio manager uses derivatives to enhance a Fund's return or as a substitute for a position or security, rather than solely to hedge (or offset) the risk of a position or security held by the Fund. The success of management's derivatives strategies will also be affected by its ability to assess and predict the impact of market or economic developments on the underlying asset, index or rate and the derivative itself, without the benefit of observing the performance of the derivative under all possible market conditions. Certain derivative positions may be difficult to close out when a Fund's portfolio manager may believe it would be appropriate to do so. Certain derivative positions (e.g., over-the-counter swaps) are subject to counterparty risk.

The U.S. government recently enacted legislation that provides for new regulation of the derivatives market, including clearing, margin, reporting and registration requirements. Because the legislation leaves much to rule making, its ultimate impact remains unclear. New regulations could, among other things, restrict a Fund's ability to engage in derivatives transactions (for example, by making certain types of derivatives transactions no longer available to the Fund) and/or increase the costs of such derivatives transactions (for example, by increasing margin or capital requirements), and the Fund may be unable to execute its investment strategy as a result. It is unclear how the regulatory changes will affect counterparty risk.

Foreign Currency Transactions Risk

Foreign securities are often denominated in foreign currencies. As a result, the value of a Fund's shares is affected by changes in exchange rates. To manage this risk, a Fund may enter into foreign currency futures contracts and foreign currency exchange contracts to hedge against a decline in the U.S. dollar value of a security it already owns or against an increase in the value of an asset it expects to purchase. Use of hedging techniques cannot protect against exchange rate risk perfectly. If a Fund's adviser is incorrect in its judgment of future exchange rate relationships, a Fund could be in a less advantageous position than if such a hedge had not been established. Losses on foreign currency transactions used for hedging purposes may be reduced by gains on the assets that are the subject of a hedge. A Fund may also purchase a foreign currency on a spot or forward basis in order to benefit from potential appreciation of such currency relative to the U.S. dollar or to other currencies in which a Fund's holdings are denominated. Losses on such transactions may not be reduced by gains from other Fund assets. A Fund's gains from its positions in foreign currencies may accelerate and/or recharacterize the Fund's income or gains and its distributions to shareholders. The Fund's losses from such positions may also recharacterize the Fund's income and its distributions to shareholders and may cause a return of capital to Fund shareholders.

Foreign Investment Risk

Foreign investments, including American Depositary Receipts (ADRs) and similar investments, are subject to more risks than U.S. domestic investments. These additional risks may potentially include lower liquidity, greater price volatility and risks related to adverse political, regulatory, market or economic developments. Foreign companies also may be subject to significantly higher levels of taxation than U.S. companies, including potentially confiscatory levels of taxation, thereby reducing the earnings potential of such foreign companies. In addition, amounts realized on sales or distributions of

foreign securities may be subject to high and potentially confiscatory levels of foreign taxation and withholding when compared to comparable transactions in U.S. securities. Investments in foreign securities involve exposure to changes in foreign currency exchange rates. Such changes may reduce the U.S. dollar value of the investment. Foreign investments are also subject to risks including potentially higher withholding and other taxes, trade settlement, custodial, and other operational risks and less stringent investor protection and disclosure standards in certain foreign markets. In addition, foreign markets can and often do perform differently from U.S. markets.

Growth Style Investment Risk

Growth stocks can perform differently from the market as a whole and from other types of stocks. Growth stocks may be designated as such and purchased based on the premise that the market will eventually reward a given company's long-term earnings growth with a higher stock price when that company's earnings grow faster than both inflation and the economy in general. Thus a growth style investment strategy attempts to identify companies whose earnings may or are growing at a rate faster than inflation and the economy. While growth stocks may react differently to issuer, political, market and economic developments than the market as a whole and other types of stocks by rising in price in certain environments, growth stocks also tend to be sensitive to changes in the earnings of their underlying companies and more volatile than other types of stocks, particularly over the short term. Furthermore, growth stocks may be more expensive relative to their current earnings or assets compared to the values of other stocks, and if earnings growth expectations moderate, their valuations may return to more typical norms, causing their stock prices to fall. Finally, during periods of adverse economic and market conditions, the stock prices of growth stocks may fall despite favorable earnings trends.

Issuer Risk

The value of a security may decline for a number of reasons that directly relate to the issuer or an entity providing credit support or liquidity support, such as management performance, financial leverage, and reduced demand for the issuer's goods, services or securities.

Leverage Risk

Certain transactions may give rise to a form of leverage. Such transactions may include, among others, reverse repurchase agreements, loans of portfolio securities, and the use of when-issued, delayed delivery or forward commitment transactions. Certain derivatives may also create leverage. The use of leverage may cause a Fund to liquidate portfolio positions when it may not be advantageous to do so. Leveraging, including borrowing, may cause a Fund to be more volatile than if the Fund had not been leveraged. This is because leverage tends to increase a Fund's exposure to market risk, interest rate risk or other risks by, in effect, increasing assets available for investment.

Liquidity Risk

A security may not be able to be sold at the time desired or without adversely affecting the price.

Management Risk

We cannot guarantee that a Fund will meet its investment objective. We do not guarantee the performance of a Fund, nor can we assure you that the market value of your investment will not decline. We will not "make good" on any investment loss you may suffer, nor does anyone we contract with to provide services promise to make good on any such losses.

Market Risk

The market price of securities owned by a Fund may go up or down, sometimes rapidly or unpredictably. Securities may decline in value or become illiquid due to factors affecting securities markets generally or particular industries represented in the securities markets, such as labor shortages or increased production costs and competitive conditions within an industry. A security may decline in value or become illiquid due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. During a general downturn in the securities markets, multiple asset classes may decline in value or become illiquid simultaneously. Equity securities generally have greater price volatility than debt securities.

Options Risk

Options trading is a highly specialized investment activity which entails additional risks than those resulting from trading in traditional securities. Options may be more volatile than the underlying instruments, and therefore, on a percentage basis, an investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves. A Fund that purchases options is subject to the risk of a complete loss of the amounts paid as premiums to the writer of the option. A Fund that writes options is subject to the risk that its forecast of market value or other relevant factors is incorrect, which could cause the Fund to be in a worse position than it would have been had it had not written

the option. In addition, there can be no assurance that a liquid market will exist when a Fund seeks to close out an option position.

Regulatory Risk

Changes in government regulations may adversely affect the value of a security. An insufficiently regulated industry or market might also permit inappropriate practices that adversely affect an investment.

Sector Emphasis Risk

Investing a substantial portion of a Fund's assets in related industries or sectors may have greater risks because companies in these sectors may share common characteristics and may react similarly to market developments.

Smaller Company Securities Risk

Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than larger company stocks. Smaller companies may have no or relatively short operating histories, or be newly public companies. Some of these companies have aggressive capital structures, including high debt levels, or are involved in rapidly growing or changing industries and/or new technologies, which pose additional risks.

Value Style Investment Risk

Value stocks can perform differently from the market as a whole and from other types of stocks. Value stocks may be purchased based upon the belief that a given security may be out of favor. Value investing seeks to identify stocks that have depressed valuations, based upon a number of factors which are thought to be temporary in nature, and to sell them at superior profits when their prices rise in response to resolution of the issues which caused the valuation of the stock to be depressed. While certain value stocks may increase in value more quickly during periods of anticipated economic upturn, they may also lose value more quickly in periods of anticipated economic downturn. Furthermore, there is the risk that the factors which caused the depressed valuations are longer term or even permanent in nature, and that there will not be any rise in valuation. Finally, there is the increased risk in such situations that such companies may not have sufficient resources to continue as ongoing businesses, which would result in the stock of such companies potentially becoming worthless.

Portfolio Holdings Information

A description of the *Wells Fargo Advantage Funds'* policies and procedures with respect to disclosure of the *Wells Fargo Advantage Funds'* portfolio holdings is available in the Funds' Statement of Additional Information and on the *Wells Fargo Advantage Funds'* Web site at wellsfargoadvantagefunds.com. In addition, Funds Management will, from time to time, include portfolio holdings information in periodic commentaries for certain Funds. The substance of the information contained in such commentaries will also be posted to the Funds' Web site at wellsfargoadvantagefunds.com.

Organization and Management of the Funds

About Wells Fargo Funds Trust

The Trust was organized as a Delaware statutory trust on March 10, 1999. The Board of Trustees of the Trust (Board) supervises each Fund's activities, monitors its contractual arrangements with various service providers and decides on matters of general policy.

The Board supervises the Funds and approves the selection of various companies hired to manage the Funds' operations. Except for the Funds' advisers, which generally may be changed only with shareholder approval, other service providers may be changed by the Board without shareholder approval.

The Adviser

Wells Fargo Funds Management, LLC, located at 525 Market Street, San Francisco, CA 94105, serves as the investment adviser for the Funds. Funds Management, an indirect, wholly owned subsidiary of Wells Fargo & Company, is the mutual fund advisory subsidiary of Wells Fargo Bank. Wells Fargo Bank, which was founded in 1852, is the oldest bank in the western United States and is one of the largest banks in the United States. As adviser, Funds Management is responsible for implementing the investment policies and guidelines for the Funds and for supervising the sub-adviser who is responsible for the day-to-day portfolio management of the Funds. For providing these services, Funds Management is entitled to receive fees as described in each Fund's table of Annual Fund Operating Expenses under the caption "Management Fees." A discussion regarding the basis for the Board's approval of the advisory and sub-advisory agreements for each Fund is available in the Funds' semi-annual report for the fiscal period ended April 30, 2011.

For a Fund's most recent fiscal year end, the advisory fee paid to Funds Management, net of any applicable waivers and reimbursements, was as follows:

Advisory Fees Paid

	As a % of average daily net assets
Intrinsic Small Cap Value Fund	0.77%
Small Cap Value Fund	0.71%
Small Mid Cap Value Fund	0.72%
Special Small Cap Value Fund	0.73%
Traditional Small Cap Growth Fund	0.74%

Wells Fargo & Company is a diversified financial services company providing banking, insurance, investments, mortgage and consumer finance services. The involvement of various subsidiaries of Wells Fargo & Company, including Funds Management, in the management and operation of the Funds and in providing other services or managing other accounts gives rise to certain actual and potential conflicts of interest.

For example, certain investments may be appropriate for a Fund and also for other clients advised by Funds Management and its affiliates, and there may be market or regulatory limits on the amount of investment, which may cause competition for limited positions. Also, various client and proprietary accounts may at times take positions that are adverse to a Fund. Funds Management applies various policies to address these situations, but a Fund may nonetheless incur losses or underperformance during periods when Wells Fargo & Company, its affiliates and their clients achieve gains or outperformance.

Wells Fargo & Company may have interests in or provide services to portfolio companies or Fund shareholders or intermediaries that may not be fully aligned with the interests of all investors. Funds Management and its affiliates serve in multiple roles, including as adviser and, for most *Wells Fargo Advantage Funds*, sub-adviser, as well as administrator and principal underwriter.

These are all considerations of which an investor should be aware and which may cause conflicts that could disadvantage a Fund. Funds Management has instituted business and compliance policies, procedures and disclosures that are designed to identify, monitor and mitigate conflicts of interest.

The Sub-Advisers and Portfolio Managers

The following sub-advisers and portfolio managers perform day-to-day investment management activities for the Funds. Each sub-adviser is compensated for its services by Funds Management from the fees Funds Management receives for its services as adviser to the Funds. The Statement of Additional Information provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of securities in the Funds.

Metropolitan West Capital Management, LLC (MWCM), a subsidiary of Wells Fargo, is the sub-adviser to the Intrinsic Small Cap Value Fund. As sub-adviser, MWCM manages the Fund's investments on a day-to-day basis. MWCM has been managing investment portfolios since 1997 and is located at 610 Newport Center Drive, Suite 1000, Newport Beach, CA 92660.

Samir Sikka Intrinsic Small Cap Value Fund	Mr. Sikka is jointly responsible for managing the Intrinsic Small Cap Value Fund, which he has managed since 2010. Mr. Sikka joined MWCM in 2006, where he is currently a managing director and lead strategist.
Alex Alvarez, CFA Intrinsic Small Cap Value Fund	Mr. Alvarez is jointly responsible for managing the Intrinsic Small Cap Value Fund, which he has managed since 2010. Mr. Alvarez joined MWCM in 2008, where he currently serves as an equity analyst. Previously, he served as Vice President with The Goldman Sachs Group, Inc.

Wells Capital Management Incorporated (Wells Capital Management), an affiliate of Funds Management, an indirect wholly owned subsidiary of Wells Fargo & Company, located at 525 Market Street, San Francisco, CA 94105, is the sub-adviser for the Small Cap Value Fund, Small/Mid Cap Value Fund, Special Small Cap Value Fund and Traditional Small Cap Growth Fund. Accordingly, Wells Capital Management is responsible for the day-to-day investment management activities of these Funds. Wells Capital Management is a registered investment adviser that provides investment advisory services for registered mutual funds, company retirement plans, foundations, endowments, trust companies, and high net-worth individuals.

Erik C. Astheimer Small/Mid Cap Value Fund Small Cap Value Fund	Mr. Astheimer is jointly responsible for managing the Small/Mid Cap Value Fund, which he has managed since 2008, and the Small Cap Value Fund, which he has managed since 2011. Mr. Astheimer joined Wells Capital Management in 2005, where he currently serves as a portfolio manager.
Paul Carder, CFA Traditional Small Cap Growth Fund	Mr. Carder is jointly responsible for managing the the Traditional Small Cap Growth Fund, which he has managed, along with its predecessor fund, since 2005. Mr. Carder has been with Wells Capital Management or one of its predecessors since 2005. He currently serves as a director and portfolio manager.
Jeffrey S. Drummond, CFA Traditional Small Cap Growth Fund	Mr. Drummond is jointly responsible for managing the the Traditional Small Cap Growth Fund, which he has managed, along with its predecessor fund, since 1993. Mr. Drummond has been with Wells Capital Management or one of its predecessors since 1988. He currently serves as a managing director and senior portfolio manager.
Linda Freeman, CFA Traditional Small Cap Growth Fund	Ms. Freeman is jointly responsible for managing the the Traditional Small Cap Growth Fund, which she has managed, along with its predecessor fund, since 1991. Ms. Freeman has been with Wells Capital Management or one of its predecessors since 1991. She currently serves as a managing director and senior portfolio manager.
Jeffrey Harrison, CFA Traditional Small Cap Growth Fund	Mr. Harrison is jointly responsible for managing the the Traditional Small Cap Growth Fund, which he has managed, along with its predecessor fund, since 1997. Mr. Harrison has been with Wells Capital Management or one of its predecessors since 1997. He currently serves as a director and portfolio manager.
Robert Rifkin, CFA Special Small Cap Value Fund	Mr. Rifkin is jointly responsible for managing the Special Small Cap Value Fund which he has managed since 2010. Mr. Rifkin has been with Wells Capital Management or one of its predecessors since 1997. He currently serves as a portfolio manager.
I. Charles Rinaldi Small Cap Value Fund Small/Mid Cap Value Fund	Mr. Rinaldi is jointly responsible for managing the Small Cap Value Fund and the Small/Mid Cap Value Fund, both of which he has managed, along with their predecessor funds, since 1997. Mr. Rinaldi joined Wells Capital Management in 2005 as senior portfolio manager and still serves in that capacity.
Michael Schneider, CFA Small/Mid Cap Value Fund Small Cap Value Fund	Mr. Schneider is jointly responsible for managing the Small/Mid Cap Value Fund, which he has managed since 2008, and the Small Cap Value Fund, which he has managed since 2011. Mr. Schneider joined Wells Capital Management in 2005 where he currently serves as a portfolio manager.

James M. Tringas, CFA, CPA
Special Small Cap Value Fund

Mr. Tringas is jointly responsible for managing the Special Small Cap Value Fund, which he has managed since 2002. Mr. Tringas has been with Wells Capital Management or one of its predecessor firms since 1994. Currently, he serves as a managing director and senior portfolio manager.

Dormant Multi-Manager Arrangement

The Board has adopted a "multi-manager" arrangement for the Funds. Under this arrangement, each Fund and Funds Management may engage one or more sub-advisers to make day-to-day investment decisions for the Fund's assets. Funds Management would retain ultimate responsibility (subject to the oversight of the Board) for overseeing the sub-advisers and may, at times, recommend to the Board that the Fund: (1) change, add or terminate one or more sub-advisers; (2) continue to retain a sub-adviser even though the sub-adviser's ownership or corporate structure has changed; or (3) materially change a sub-advisory agreement with a sub-adviser.

Applicable law generally requires a Fund to obtain shareholder approval for most of these types of recommendations, even if the Board approves the proposed action. Under the "multi-manager" arrangement approved by the Board, the Fund will seek exemptive relief, if necessary, from the SEC to permit Funds Management (subject to the Board's oversight and approval) to make decisions about the Fund's sub-advisory arrangements without obtaining shareholder approval. The Fund will continue to submit matters to shareholders for their approval to the extent required by applicable law. Meanwhile, this multi-manager arrangement will remain dormant and will not be implemented until shareholders are further notified.

A Choice of Share Classes

After choosing a Fund, your next most important choice will be which share class to buy. The table below summarizes the features of the classes of shares available through this Prospectus. Specific Fund charges may vary, so you should review each Fund's fee table as well as the sales charge schedules that follow. Finally, you should review the "Reductions and Waivers of Sales Charges" section of the Prospectus before making your decision as to which share class to buy.

	Class A	Class B ¹	Class C
Initial Sales Charge	5.75%	None. Your entire investment goes to work immediately.	None. Your entire investment goes to work immediately.
Contingent deferred sales charge (CDSC)	None (except that a charge of 1% applies to certain redemptions made within eighteen months, following purchases of \$1 million or more without an initial sales charge).	5% and declines until it reaches 0% at the beginning of the 7th year.	1% if shares are sold within one year after purchase.
Ongoing distribution (12b-1) fees	None.	0.75%	0.75%
Purchase maximum	None. Volume reductions given upon providing adequate proof of eligibility.	\$100,000	\$1,000,000
Annual Expenses	Lower ongoing expenses than Classes B and C.	Higher ongoing expenses than Class A because of higher 12b-1 fees.	Higher ongoing expenses than Class A because of higher 12b-1 fees.
Conversion feature	Not applicable.	Yes. Converts to Class A shares after a certain number of years depending on the Fund, so annual expenses decrease.	No. Does not convert to Class A shares, so annual expenses do not decrease.

1. Class B shares are closed to new investors and additional investments from existing shareholders, except in connection with the reinvestment of any distributions and permitted exchanges and in connection with the closing of a reorganization. For Class B shares currently outstanding and Class B shares acquired upon reinvestment of dividends, all Class B share attributes, including associated CDSC schedules, conversion features, any applicable CDSC waivers, and distribution plan and shareholder services plan fees, will continue in effect.

Information regarding the Funds' sales charges, breakpoints, and waivers is available free of charge on our Web site at wellsfargoadvantagemutual.com. You may wish to discuss this choice with your financial consultant.

Class A Shares Sales Charge Schedule

If you choose to buy Class A shares, you will pay the public offering price (POP) which is the net asset value (NAV) plus the applicable sales charge. Since sales charges are reduced for Class A share purchases above certain dollar amounts, known as "breakpoint levels," the POP is lower for these purchases. The dollar amount of the sales charge is the difference between the POP of the shares purchased (based on the applicable sales charge in the table below) and the NAV of those shares. Because of rounding in the calculation of the POP, the actual sales charge you pay may be more or less than that calculated using the percentages shown below.

Class A Shares Sales Charge Schedule

Amount of Purchase	Front-end Sales Charge As % of Public Offering Price	Front-end Sales Charge As % of Net Amount Invested	Dealer Reallowance As % of Public Offering Price
Less than \$50,000	5.75%	6.10%	5.00%
\$50,000 - \$99,999	4.75%	4.99%	4.00%
\$100,000 - \$249,999	3.75%	3.90%	3.00%
\$250,000 - \$499,999	2.75%	2.83%	2.25%
\$500,000 - \$999,999	2.00%	2.04%	1.75%
\$1,000,000 and over ¹	0.00%	0.00%	1.00%

1. We will assess a 1.00% CDSC on Class A share purchases of \$1,000,000 or more if they are redeemed within eighteen months from the date of purchase. Certain exceptions apply (see "CDSC Waivers"). The CDSC percentage you pay is applied to the NAV of the shares on the date of original purchase.

Class B Shares Sales Charges

Class B shares are closed to new investors and additional investments from existing shareholders, except that existing shareholders of Class B shares may reinvest any distributions into Class B shares and exchange their Class B shares for Class B shares of other *Wells Fargo Advantage Funds* (as permitted by our exchange policy) and specified persons may acquire Class B shares of a Fund in connection with the closing of a reorganization. No new or subsequent investments, including through automatic investment plans, will be allowed in Class B shares of the Funds, except through a distribution reinvestment or permitted exchange or in connection with the closing of a reorganization. For Class B shares currently outstanding and Class B shares acquired upon reinvestment of dividends, all Class B shares attributes, including associated CDSC schedules, conversion features, any applicable CDSC waivers, and distribution plan and shareholder services plan fees, will continue in effect. You will not be assessed a CDSC on Fund shares you redeem that were purchased with reinvested distributions. Class B share exchanges will not trigger the CDSC and the new shares will continue to age according to their original schedule and will be charged the CDSC applicable to the original shares upon redemption.

If you exchange Class B shares received in a reorganization for Class B shares of another Fund, you will retain the CDSC schedules of your exchanged shares.

Class C Shares Sales Charges

If you choose Class C shares, you buy them at NAV and agree that if you redeem your shares within one year of the purchase date, you will pay a CDSC of 1.00%. At the time of purchase, the Fund's distributor pays sales commissions of up to 1.00% of the purchase price to selling agents and up to 1.00% annually thereafter. The CDSC percentage you pay is applied to the NAV of the shares on the date of original purchase. For Class C shares received in a reorganization, your date of purchase is the original purchase date of your predecessor Fund. To determine whether the CDSC applies to a redemption, the Fund will first redeem shares acquired by reinvestment of any distributions and then will redeem shares in the order in which they were purchased (such that shares held the longest are redeemed first). Class C shares do not convert to Class A shares, and therefore continue to pay higher ongoing expenses.

Reductions and Waivers of Sales Charges

Generally, we offer more sales charge reductions or waivers for Class A shares than for Class B and Class C shares, particularly if you intend to invest greater amounts. You should consider whether you are eligible for any of the potential reductions or waivers when you are deciding which share class to buy. Consult the Statement of Additional Information for further details regarding reductions and waivers of sales charges.

Class A Shares Sales Charge Reductions and Waivers

You can pay a lower or no sales charge for the following types of purchases. If you believe you are eligible for any of the following reductions or waivers, it is up to you to ask the selling agent or shareholder servicing agent for the reduction or waiver and to provide appropriate proof of eligibility.

- You pay no sales charges on Fund shares you buy with reinvested distributions.
- You pay a lower sales charge if you are investing an amount over a breakpoint level. See “Class A Shares Sales Charge Schedule” above.
- You pay no sales charges on Fund shares you purchase with the proceeds of a redemption of either Class A or Class B shares of the same Fund within 120 days of the date of the redemption. (Please note, you will still be charged any applicable CDSC on Class B shares you redeem.) Subject to the Funds’ policy regarding frequent purchases and redemptions of Fund shares, you may not be able to exercise this provision for the first 30 days after your redemption.
- By signing a **Letter of Intent (LOI)** prior to purchase, you pay a lower sales charge now in exchange for promising to invest an amount over a specified breakpoint within the next 13 months. Purchases made prior to signing the LOI as well as reinvested dividends and capital gains do not count as purchases made during this period. We will hold in escrow shares equal to approximately 5% of the amount you say you intend to buy. If you do not invest the amount specified in the LOI before the expiration date, we will redeem enough escrowed shares to pay the difference between the reduced sales load you paid and the sales load you should have paid. Otherwise, we will release the escrowed shares when you have invested the agreed amount.
- **Rights of Accumulation (ROA)** allow you to combine Class A, Class B, Class C and WealthBuilder Portfolio shares of any Wells Fargo Advantage Fund already owned (excluding Wells Fargo Advantage money market fund shares, unless you notify us that you previously paid a sales load on these assets) in order to reach breakpoint levels and to qualify for sales load discounts on subsequent purchases of Class A or WealthBuilder Portfolio shares. The purchase amount used in determining the sales charge on your purchase will be calculated by multiplying the maximum public offering price by the number of Class A, Class B, Class C and WealthBuilder Portfolio shares of any Wells Fargo Advantage Fund already owned and adding the dollar amount of your current purchase.

How a Letter of Intent Can Save You Money!

If you plan to invest, for example, \$100,000 in a Wells Fargo Advantage Fund in installments over the next year, by signing a letter of intent you would pay only 3.75% sales load on the entire purchase. Otherwise, you might pay 5.75% on the first \$49,999, then 4.75% on the next \$50,000!

Accounts That Can Be Aggregated

You may aggregate the following types of accounts indicated below to qualify for a volume discount:

Can this type of account be aggregated?	Yes	No
Individual accounts	✓	
Joint accounts	✓	
UGMA/UTMA accounts	✓	
Trust accounts over which the shareholder has individual or shared authority	✓	
Solely owned business accounts	✓	
Retirement Plans		
Traditional and Roth IRAs	✓	
SEP IRAs	✓	
SIMPLE IRAs that use the <i>Wells Fargo Advantage Funds</i> prototype agreement ¹		✓
SIMPLE IRAs that do not use the <i>Wells Fargo Advantage Funds</i> prototype agreement	✓	
403(b) Plan accounts ²	✓	
401(k) Plan accounts		✓
Other Accounts		
529 Plan accounts ¹		✓
Accounts held through other brokerage firms		✓

1. These accounts may be aggregated at the plan level for purposes of establishing eligibility for volume discounts. When plan assets in Fund Class A, Class B, Class C and WealthBuilder Portfolio shares (excluding Wells Fargo Advantage money market fund shares) reach a breakpoint, all plan participants benefit from the reduced sales charge. Participant accounts will not be aggregated with personal accounts.
2. Wells Fargo Advantage Funds no longer offers new or accepts purchases in existing 403(b) accounts utilizing the Wells Fargo Advantage Funds prototype agreement.

Based on the above chart, if you believe that you own Fund shares in one or more accounts that can be combined with your current purchase to achieve a sales charge breakpoint, you must, at the time of your purchase specifically identify those shares to your selling agent or shareholder servicing agent. For an account to qualify for a volume discount, it must be registered in the name of, or held for, the shareholder, his or her spouse or domestic partner, as recognized by applicable state law, or his or her children under the age of 21. Class A shares purchased at NAV will not be aggregated with other Fund shares for purposes of receiving a volume discount.

Class A Shares Sales Charge Waivers for Certain Parties

We reserve the right to enter into agreements that reduce or waive sales charges for groups or classes of shareholders. If you own Fund shares as part of another account or package such as an IRA or a sweep account, you should read the materials for that account. Those terms may supercede the terms and conditions discussed here. If you fall into any of the following categories, you can buy Class A shares at NAV:

- Current and retired employees, directors/trustees and officers of:
 - 1) *Wells Fargo Advantage Funds* (including any predecessor funds);
 - 2) Wells Fargo & Company and its affiliates; and
 - 3) family members (spouse, domestic partner, parents, grandparents, children, grandchildren and siblings (including step and in-law)) of any of the above.
- Current employees of:
 - 1) the Fund's transfer agent;
 - 2) broker-dealers who act as selling agents;
 - 3) family members (spouse, domestic partner, parents, grandparents, children, grandchildren and siblings (including step and in-law)) of any of the above; and
 - 4) each Fund's sub-adviser, but only for the Fund(s) for which such sub-adviser provides investment advisory services.
- Qualified registered investment advisers who buy through a broker-dealer or service agent who has entered into an agreement with the Fund's distributor that allows for load-waived Class A purchases.
- Investment companies exchanging shares or selling assets pursuant to a reorganization, merger, acquisition, or exchange offer to which the Fund is a party.
- Section 529 college savings plan accounts.
- Insurance company separate accounts.
- Fund of Funds, including those advised by Funds Management (*Wells Fargo Advantage WealthBuilder Portfolios*SM), subject to review and approval by Funds Management.

- Investors who held Advisor Class shares of a Wells Fargo Advantage Fund at the close of business on June 20, 2008 (the "Eligibility Time"), so long as the following conditions are met:
 - 1) any purchases at NAV are limited to Class A shares of the same Fund in which the investor held Advisor Class shares at the Eligibility Time;
 - 2) share purchases are made in the same account through which the investor held Advisor Class shares at the Eligibility Time;
 - 3) the owner of the account remains the same as the account owner at the Eligibility Time; and
 - 4) following the Eligibility Time, the account maintains a positive account balance at some time during a period of at least six months in length.
- Investors who held Advisor Class shares at the Eligibility Time are also eligible to exchange their Class A shares for Class A shares of another Wells Fargo Advantage Fund without imposition of any Class A sales charges and would be eligible to make additional purchases of Class A shares of such other Fund at NAV in the account holding the shares received in exchange.

The eligibility of such investors that hold Fund shares through an account maintained by a financial institution is also subject to the following additional limitation. In the event that such an investor's relationship with and/or the services such investor receives from the financial institution subsequently change, such investor shall thereafter no longer be eligible to purchase Class A shares at NAV. Please consult with your financial representative for further details.

- Investors who receive annuity payments under either an annuity option or from death proceeds previously invested in a Fund may reinvest such payments or proceeds in the Fund within 120 days of receiving such distribution.
- Investors who purchase shares that are to be included in certain retirement, benefit, pension, trust or investment "wrap accounts" or through an omnibus account maintained with a Fund by a broker-dealer.
- Former Evergreen Class IS shareholders who received Class A shares of a Fund as a result of a reorganization can continue to purchase Class A shares of that Fund and any other Wells Fargo Advantage Fund purchased subsequently by exchange at net asset value, without paying the customary sales load, after which subsequent purchases of shares of the subsequent Fund may also be made at net asset value.
- Former Evergreen Class R shareholders who received Class A shares of a Fund as a result of a reorganization can continue to purchase Class A shares of that Fund and any other Wells Fargo Advantage Fund purchased subsequently by exchange at net asset value, without paying the customary sales load, after which subsequent purchases of shares of the subsequent Fund may also be made at net asset value.

CDSC Waivers

- You will not be assessed a CDSC on Fund shares you redeem that were purchased with reinvested distributions.
- We waive the CDSC for all redemptions made because of scheduled (Internal Revenue Code Section 72(t)(2) withdrawal schedule) or mandatory (withdrawals generally made after age 70½ according to Internal Revenue Service guidelines) distributions from traditional IRAs and certain other retirement plans. (See your retirement plan information for details.)
- We waive the CDSC for redemptions made in the event of the last surviving shareholder's death or for a disability suffered after purchasing shares. ("Disabled" is defined in Internal Revenue Code Section 72(m)(7).)
- We waive the CDSC for redemptions made at the direction of Funds Management in order to, for example, complete a merger or effect a Fund liquidation.
- For Class B shares purchased after May 18, 1999, for former Norwest Advantage Funds shareholders and after July 17, 1999 for former Stagecoach Funds shareholders, for all Class B shares purchased after November 8, 1999, no CDSC is imposed on withdrawals that meet both of the following circumstances:
 - withdrawals are made by participating in the Systematic Withdrawal Plan; and
 - withdrawals may not exceed 10% of your Fund assets (limit for Class B shares calculated annually based on your anniversary date in the Systematic Withdrawal Plan).
- We waive the Class C shares CDSC if the dealer of record waived its commission.
- We waive the Class C shares CDSC where a Fund did not pay a sales commission at the time of purchase.

We also reserve the right to enter into agreements that reduce or eliminate sales charges for groups or classes of shareholders, or for Fund shares included in other investment plans such as "wrap accounts." If you own Fund shares as part of another account or package, such as an IRA or a sweep account, you should read the terms and conditions that apply for that account. Those terms and conditions may supercede the terms and conditions discussed here. Contact your selling agent for further information.

Compensation to Dealers and Shareholders Servicing Agents

Distribution Plan

Each Fund has adopted a Distribution Plan (12b-1 Plan) pursuant to Rule 12b-1 under the 1940 Act for the Class B and Class C shares. The 12b-1 Plan authorizes the payment of all or part of the cost of preparing and distributing prospectuses and distribution-related services or other activities including ongoing compensation to selling agents. The 12b-1 Plan also provides that, if and to the extent any shareholder servicing payments are recharacterized as payments for distribution-related services, they are approved and payable under the 12b-1 Plan. Fees paid under the 12b-1 Plan by Class B shares that are closed to new investors and additional investments (except in connection with reinvestment of any distributions and permitted exchanges) primarily cover past sales and distribution services, as well as ongoing services to shareholders. The fees paid under this 12b-1 Plan are as follows:

Fund	Class B	Class C
Intrinsic Small Cap Value Fund	N/A	0.75%
Small Cap Value Fund	0.75%	0.75%
Small/Mid Cap Value Fund	N/A	0.75%
Special Small Cap Value Fund	0.75%	0.75%
Traditional Small Cap Growth Fund	N/A	0.75%

These fees are paid out of each Class's assets on an ongoing basis. Over time, these fees will increase the cost of your investment and may cost you more than other types of sales charges.

Shareholder Servicing Plan

The Funds have a shareholder servicing plan. Under this plan, each Fund has agreements with various shareholder servicing agents to process purchase and redemption requests, to service shareholder accounts, and to provide other related services for each Class of the Fund. For these services, each Class pays an annual fee of up to 0.25% of its average daily net assets. Selling or shareholder servicing agents, in turn, may pay some or all of these amounts to their employees or registered representatives who recommend or sell Fund shares or make investment decisions on behalf of their clients.

Additional Payments to Dealers

In addition to dealer reallowances and payments made by each Fund for distribution and shareholder servicing, the Fund's adviser, the distributor or their affiliates make additional payments ("Additional Payments") to certain selling or shareholder servicing agents for the Fund, which include broker-dealers and 401(k) service providers and recordkeepers. These Additional Payments are made in connection with the sale and distribution of shares of the Fund or for services to the Fund and its shareholders. These Additional Payments, which may be significant, are paid by the Fund's adviser, the distributor or their affiliates, out of their revenues, which generally come directly or indirectly from fees paid by the entire Fund complex.

In return for these Additional Payments, the Funds' adviser and distributor expect the Funds to receive certain marketing or servicing advantages that are not generally available to mutual funds that do not make such payments. Such advantages are expected to include, without limitation, placement of the Fund on a list of mutual funds offered as investment options to the selling agent's clients (sometimes referred to as "Shelf Space"); access to the selling agent's registered representatives; and/or ability to assist in training and educating the selling agent's registered representatives.

Certain selling or shareholder servicing agents receive these Additional Payments to supplement amounts payable by the Fund under the shareholder servicing plans. In exchange, these agents provide services including, but not limited to, establishing and maintaining accounts and records; answering inquiries regarding purchases, exchanges and redemptions; processing and verifying purchase, redemption and exchange transactions; furnishing account statements and confirmations of transactions; processing and mailing monthly statements, prospectuses, shareholder reports and other SEC-required communications; and providing the types of services that might typically be provided by each Fund's transfer agent (e.g., the maintenance of omnibus or omnibus-like accounts, the use of the National Securities Clearing Corporation for the transmission of transaction information and the transmission of shareholder mailings).

The Additional Payments may create potential conflicts of interest between an investor and a selling agent who is recommending a particular mutual fund over other mutual funds. Before investing, you should consult with your financial consultant and review carefully any disclosure by the selling agent as to what monies they receive from mutual fund advisers and distributors, as well as how your financial consultant is compensated.

The Additional Payments are typically paid in fixed dollar amounts, or based on the number of customer accounts maintained by the selling or shareholder servicing agent, or based on a percentage of sales and/or assets under management, or a combination of the above. The Additional Payments are either up-front or ongoing or both. The Additional Payments differ among selling and shareholder servicing agents. Additional Payments to a selling agent that is compensated based on its customers' assets typically range between 0.05% and 0.30% in a given year of assets invested in the Fund by the selling agent's customers. Additional Payments to a selling agent that is compensated based on a percentage of sales typically range between 0.10% and 0.15% of the gross sales of the Fund attributable to the selling agent. In addition, representatives of the Funds' distributor visit selling agents on a regular basis to educate their registered representatives and to encourage the sale of Fund shares. The costs associated with such visits may be paid for by the Fund's adviser, distributor, or their affiliates, subject to applicable FINRA regulations.

More information on the FINRA member firms that have received the Additional Payments described in this section is available in the Statement of Additional Information, which is on file with the SEC and is also available on the *Wells Fargo Advantage Funds* website at wellsfargoadvantagefunds.com.

Pricing Fund Shares

The share price (net asset value per share or NAV) for a Fund is calculated each business day as of the close of trading on the New York Stock Exchange (NYSE) (generally 4 p.m. ET). To calculate a Fund's NAV, the Fund's assets are valued and totaled, liabilities are subtracted, and the balance, called net assets, is divided by the number of shares outstanding. The price at which a purchase or redemption of Fund shares is effected is based on the next calculation of NAV after the order is placed. The Fund does not calculate its NAV on days the NYSE is closed for trading, which include New Year's Day, Martin Luther King, Jr. Day, Washington's Birthday, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

With respect to any portion of a Fund's assets that may be invested in other mutual funds, the Fund's NAV is calculated based upon the net asset values of the other mutual funds in which the Fund invests, and the prospectuses for those companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

With respect to any portion of a Fund's assets invested directly in securities, the Fund's investments are generally valued at current market prices. Securities are generally valued based on the last sale price during the regular trading session if the security trades on an exchange (closing price). Securities that are not traded primarily on an exchange generally are valued using latest quoted bid prices obtained by an independent pricing service. Securities listed on the Nasdaq Stock Market, Inc., however, are valued at the Nasdaq Official Closing Price (NOCP), and if no NOCP is available, then at the last reported sales price.

We are required to depart from these general valuation methods and use fair value pricing methods to determine the values of certain investments if we believe that the closing price or the latest quoted bid price of a security, including securities that trade primarily on a foreign exchange, does not accurately reflect its current value when the Fund calculates its NAV. In addition, we use fair value pricing to determine the value of investments in securities and other assets, including illiquid securities, for which current market quotations are not readily available. The closing price or the latest quoted bid price of a security may not reflect its current value if, among other things, a significant event occurs after the closing price or latest quoted bid price but before a Fund calculates its NAV that materially affects the value of the security. We use various criteria, including a systematic evaluation of U.S. market moves after the close of foreign markets, in deciding whether a foreign security's market price is still reliable and, if not, what fair market value to assign to the security.

In light of the judgment involved in fair value decisions, there can be no assurance that a fair value assigned to a particular security is accurate or that it reflects the price that the Fund could obtain for such security if it were to sell the security as of the time of fair value pricing. Such fair value pricing may result in NAVs that are higher or lower than NAVs based on the closing price or latest quoted bid price. See the Statement of Additional Information for additional details regarding the pricing of Fund shares.

How to Open an Account

You can open a *Wells Fargo Advantage Funds* account through any of the following means:

- directly with the Fund. Complete a *Wells Fargo Advantage Funds* application, which you may obtain by visiting our Web site at wellsfargoadvantagefunds.com or by calling Investor Services at 1-800-222-8222. Be sure to indicate the Fund name and the share class into which you intend to invest when completing the application;
- through a brokerage account with an approved selling agent; or
- through certain retirement, benefit and pension plans or certain packaged investment products. (Please contact the providers of the plan or product for instructions.)

How to Buy Shares

This section explains how you can buy shares directly from *Wells Fargo Advantage Funds*. If you're opening a new account, an account application is available on-line at wellsfargoadvantagefunds.com or by calling Investor Services at 1-800-222-8222. For Fund shares held through brokerage and other types of accounts, please consult your selling agent.

Minimum Investments	Initial Purchase	Subsequent Purchases
Regular accounts IRAs, IRA rollovers, Roth IRAs UGMA/UTMA accounts Employer Sponsored Retirement Plans	\$1,000 \$250 \$50 No minimum	\$100 \$100 \$50 No minimum
Buying Shares	Opening an Account	Adding to an Account

General Notes for Buying Shares

- **Proper Form.** If the transfer agent receives your new account application or purchase request in proper form before the close of the NYSE, your transaction will be priced at that day's NAV. If your new account application or purchase request is received in proper form after the close of trading on the NYSE, your transaction will be priced at the next business day's NAV. If your new account application or purchase request is not in proper form, additional documentation may be required to process your transaction.
- **Earnings Distributions.** You are eligible to earn distributions beginning on the business day after the transfer agent receives your purchase in proper form.
- **U.S. Dollars Only.** All payments must be in U.S. dollars, and all checks must be drawn on U.S. banks.
- **Insufficient Funds.** You will be charged a \$25.00 fee for every check or Electronic Funds Transfer that is returned to us as unpaid.
- **No Fund Named.** When all or a portion of a payment is received for investment without a clear Fund designation, we may direct the undesignated portion or the entire amount, as applicable, into the Wells Fargo Advantage Money Market Fund. We will treat your inaction as approval of this purchase until you later direct us to sell or exchange these shares of the Money Market Fund, at the next NAV calculated after we receive your order in proper form.
- **Right to Refuse an Order.** We reserve the right to refuse or cancel a purchase or exchange order for any reason, including if we believe that doing so would be in the best interests of a Fund and its shareholders.
- **Minimum Initial and Subsequent Investment Waivers.** We allow a reduced minimum initial investment of \$50 if you sign up for at least a \$50 monthly automatic investment purchase plan. If you opened your account with the set minimum amount shown in the above chart, we allow reduced subsequent purchases for a minimum of \$50 a month if you purchase through an automatic investment plan. We may also waive or reduce the minimum initial and subsequent investment amounts for purchases made through certain retirement, benefit and pension plans, certain packaged investment products, or for certain classes of shareholders as permitted by the SEC. Check specific disclosure statements and applications for the program through which you intend to invest.

Special Considerations When Investing Through Financial Intermediaries

If a financial intermediary purchases shares on your behalf, you should understand the following:

- **Minimum Investments and Other Terms of Your Account.** Share purchases are made through a customer account at your financial intermediary following that firm's terms. Financial intermediaries may require different minimum investment amounts. Please consult an account representative from your financial intermediary for specifics.
- **Records are Held in Financial Intermediary's Name.** Financial intermediaries are usually the holders of record for shares held through their customer accounts. The financial intermediaries maintain records reflecting their customers' beneficial ownership of the shares.
- **Purchase/Redemption Orders.** Financial intermediaries are responsible for transmitting their customers' purchase and redemption orders to the Funds and for delivering required payment on a timely basis.
- **Shareholder Communications.** Financial intermediaries are responsible for delivering shareholder communications and voting information from the Funds, and for transmitting shareholder voting instructions to the Funds.

The information provided in this Prospectus is not intended for distribution to, or use by, any person or entity in any non-U.S. jurisdiction or country where such distribution or use would be contrary to law or regulation, or which would subject Fund shares to any registration requirement within such jurisdiction or country.

The Funds are distributed by Wells Fargo Funds Distributor, LLC, a member of FINRA/SIPC, and an affiliate of Wells Fargo & Company. Securities Investor Protection Corporation ("SIPC") information and brochure are available at SIPC.org or by calling SIPC at (202) 371-8300.

How to Sell Shares

The following section explains how you can sell shares held directly through an account with *Wells Fargo Advantage Funds*. For Fund shares held through brokerage or other types of accounts, please consult your selling agent.

Selling Shares	To Sell Some or All of Your Shares
By Internet	Visit our Web site at wellsfargoadvantagefunds.com . Redemptions requested online are limited to a maximum of \$100,000. You may be eligible for an exception to this maximum. Please call Investor Services at 1-800-222-8222 for more information.
By Mail	<ul style="list-style-type: none"> ■ Send a Letter of Instruction providing your name, account number, the Fund from which you wish to redeem and the dollar amount you wish to receive (or write "Full Redemption" to redeem your remaining account balance) to the address below. ■ Make sure all account owners sign the request exactly as their names appear on the account application. ■ A medallion guarantee may be required under certain circumstances (see "General Notes for Selling Shares"). <p>Regular Mail <i>Wells Fargo Advantage Funds</i> P.O. Box 8266 Boston, MA 02266-8266</p> <p>Overnight Only <i>Wells Fargo Advantage Funds</i> c/o Boston Financial Data Services 30 Dan Road Canton, MA 02021-2809</p>
By Wire	<ul style="list-style-type: none"> ■ To arrange for a Federal Funds wire, call 1-800-222-8222. ■ Be prepared to provide information on the commercial bank that is a member of the Federal Reserve wire system. ■ Wire requests are sent to your bank account next business day if your request to redeem is received before the NYSE close.
By Telephone/ Electronic Funds Transfer (EFT)	<ul style="list-style-type: none"> ■ Call an Investor Services representative at 1-800-222-8222 or use the automated phone system 1-800-368-7550. ■ Telephone privileges are automatically made available to you unless you specifically decline them on your account application or subsequently in writing. ■ Redemption requests may not be made by phone if the address on your account was changed in the last 15 days. In this event, you must request your redemption by mail (refer to the section on selling shares by mail). ■ A check will be mailed to the address on record (if there have been no changes communicated to us within the last 15 days) or transferred to a linked bank account. ■ Transfers made to a Wells Fargo Bank account are made available sooner than transfers to an unaffiliated institution. ■ Redemptions processed by EFT to a linked Wells Fargo Bank account occur same day for Wells Fargo Advantage money market funds, and next day for all other <i>Wells Fargo Advantage Funds</i>. ■ Redemptions to any other linked bank account may post in two business days. Please check with your financial institution for timing of posting and availability of funds. <p>Note: Telephone transactions such as redemption requests made over the phone generally require only one of the account owners to call unless you have instructed us otherwise.</p>
Through Your Investment Representative	Contact your investment representative.

General Notes For Selling Shares

- **Proper Form.** If the transfer agent receives your request to sell shares in proper order before the close of the NYSE, your transaction will be priced at that day's NAV. If your request to sell shares is received after the close of trading on the NYSE, it will be priced at the next business day's NAV. If your request is not in proper form, additional documentation may be required to sell your shares.
- **CDSC Fees.** Your redemption proceeds are net of any applicable CDSC fees.

- **Form of Redemption Proceeds.** You may request that your redemption proceeds be sent to you by check, by EFT into a bank account, or by wire. Please call Investor Services regarding requirements for linking bank accounts or for wiring funds. Although generally we pay redemption requests in cash, we reserve the right to determine in our sole discretion, whether to satisfy redemption requests by making payment in securities (known as a redemption in kind). In such case, we may pay all or part of the redemption in securities of equal value as permitted under the 1940 Act, and the rules thereunder. The redeeming shareholder should expect to incur transaction costs upon the disposition of the securities received.
- **Telephone/Internet Redemptions.** We will take reasonable steps to confirm that telephone and internet instructions are genuine. For example, we require proof of your identification, such as a Taxpayer Identification Number or username and password, before we will act on instructions received by telephone or the internet. We will not be liable for any losses incurred if we follow telephone or internet instructions we reasonably believe to be genuine. Your call may be recorded.
- **Right to Delay Payment.** We normally will send out checks within one business day, and in any event no more than seven days, after we accept your request to redeem. If you redeem shares recently purchased by check or through EFT or the Automatic Investment Plan, you may be required to wait up to seven business days before we will send your redemption proceeds. Our ability to determine with reasonable certainty that investments have been finally collected is greater for investments coming from accounts with banks affiliated with Funds Management than it is for investments coming from accounts with unaffiliated banks. Redemption payments also may be delayed under extraordinary circumstances or as permitted by the SEC in order to protect remaining shareholders. Such extraordinary circumstances are discussed further in the Statement of Additional Information.
- **Retirement Plans and Other Products.** If you purchased shares through a packaged investment product or retirement plan, read the directions for selling shares provided by the product or plan. There may be special requirements that supercede the directions in this Prospectus.
- **Medallion Guarantees.** Medallion guarantees are **only** required for mailed redemption requests under the following circumstances: (1) if the address on your account was changed within the last 15 days; (2) if the request includes different bank account information than is currently on your account; or (3) if the redemption is made payable to a third party. You can get a Medallion guarantee at a financial institution such as a bank or brokerage house. We do not accept notarized signatures.

How to Exchange Shares

Exchanges between *Wells Fargo Advantage Funds* involve two transactions: (1) a sale of shares of one Fund; and (2) the purchase of shares of another. In general, the same rules and procedures that apply to sales and purchases apply to exchanges. There are, however, additional factors you should keep in mind while making or considering an exchange:

- In general, exchanges may be made between like share classes of any Wells Fargo Advantage Fund offered to the general public for investment (i.e., a Fund not closed to new accounts), with the following exception: Class A shares of non-money market funds may also be exchanged for Service Class shares of any money market fund.
- Same-fund exchanges between Class A, Class C, Administrator Class, Institutional Class and Investor Class shares are permitted subject to the following conditions: (1) exchanges out of Class A and Class C shares would not be allowed if shares are subject to a CDSC; (2) in order for exchanges into Class A shares, the shareholder must be able to qualify to purchase Class A shares at net asset value based on current prospectus guidelines; and (3) the shareholder must meet the eligibility guidelines of the class being purchased in the exchange.
- An exchange request will be processed on the same business day, provided that both Funds are open at the time the request is received. If one or both Funds are closed, the exchange will be processed on the following business day.
- You should carefully read the prospectus for the Wells Fargo Advantage Fund into which you wish to exchange.
- Every exchange involves selling Fund shares, which may produce a capital gain or loss for tax purposes.
- If you are making an initial investment into a Fund through an exchange, you must exchange at least the minimum initial purchase amount for the new Fund, unless your balance has fallen below that amount due to investment performance.
- Any exchange between two *Wells Fargo Advantage Funds* must meet the minimum subsequent purchase amounts.
- Class B and Class C share exchanges will not trigger the CDSC. The new shares will continue to age according to their original schedule and will be charged the CDSC applicable to the original shares upon redemption.

Generally, we will notify you at least 60 days in advance of any changes in our exchange policy.

Frequent Purchases and Redemptions of Fund Shares

The Funds reserve the right to reject any purchase or exchange order for any reason. The Funds are not designed to serve as vehicles for frequent trading. Purchases or exchanges that a Fund determines could harm the Fund may be rejected.

Excessive trading by Fund shareholders can negatively impact a Fund and its long-term shareholders in several ways, including by disrupting Fund investment strategies, increasing transaction costs, decreasing tax efficiency, and diluting the value of shares held by long-term shareholders. Excessive trading in Fund shares can negatively impact a Fund's long-term performance by requiring it to maintain more assets in cash or to liquidate portfolio holdings at a disadvantageous time. Certain Funds may be more susceptible than others to these negative effects. For example, Funds that have a greater percentage of their investments in non-U.S. securities may be more susceptible than other Funds to arbitrage opportunities resulting from pricing variations due to time zone differences across international financial markets. Similarly, Funds that have a greater percentage of their investments in small company securities may be more susceptible than other Funds to arbitrage opportunities due to the less liquid nature of small company securities. Both types of Funds also may incur higher transaction costs in liquidating portfolio holdings to meet excessive redemption levels. Fair value pricing may reduce these arbitrage opportunities, thereby reducing some of the negative effects of excessive trading.

The Funds actively discourage and take steps to prevent the portfolio disruption and negative effects on long-term shareholders that can result from excessive trading activity by Fund shareholders. The Board has approved the Funds' policies and procedures, which provide, among other things, that Funds Management may deem trading activity to be excessive if it determines that such trading activity would likely be disruptive to a Fund by increasing expenses or lowering returns. In this regard, the Funds take steps to avoid accommodating frequent purchases and redemptions of shares by Fund shareholders. Funds Management monitors available shareholder trading information across all Funds on a daily basis. If a shareholder redeems more than \$5,000 (including redemptions that are part of an exchange transaction) from a Fund, that shareholder will be "blocked" from purchasing shares of that Fund (including purchases that are part of an exchange transaction) for 30 calendar days after the redemption. This policy does not apply to:

- Money market funds;
- Adjustable Rate Government Fund, Ultra Short-Term Income Fund and Ultra Short-Term Municipal Income Fund (the "Ultra Short Funds");

- Purchases of shares through dividend reinvestments or capital gain distributions;
- Systematic purchases, redemptions or exchanges where a financial intermediary maintaining a shareholder account identifies the transaction as a systematic purchase, redemption or exchange at the time of the transaction;
- Rebalancing transactions within certain asset allocation or "wrap" programs where the financial intermediary maintaining a shareholder account is able to identify the transaction as part of an asset allocation program approved by Funds Management;
- Transactions initiated by a registered "fund of funds" or Section 529 Plan into an underlying fund investment;
- Permitted exchanges between share classes of the same fund.
- Certain transactions involving participants in employer-sponsored retirement plans, including: participant withdrawals due to mandatory distributions, rollovers and hardships, withdrawals of shares acquired by participants through payroll deductions, and shares purchased or redeemed by a participant in connection with plan loans; and
- Purchases below \$5,000 (including purchases that are part of an exchange transaction).

In the event that an asset allocation or "wrap" program is unable to implement the policy outlined above, Funds Management may grant a program-level exception to this policy. A financial intermediary relying on the exception is required to provide Funds Management with specific information regarding its program and ongoing information about its program upon request.

Because the Ultra Short Funds are often used for short-term investments, they are designed to accommodate more frequent purchases and redemptions than longer-term funds. As a result, the Ultra Short Funds do not anticipate that frequent purchases and redemptions, under normal circumstances, will have significant adverse consequences to the Ultra Short Funds or their shareholders. Although the policies adopted by the Ultra Short Funds do not prohibit frequent trading, Funds Management will seek to prevent an investor from utilizing the Ultra Short Funds to facilitate frequent purchases and redemptions of shares in longer-term funds in contravention of the policies and procedures adopted by the longer-term funds.

In addition, Funds Management reserves the right to accept purchases, redemptions and exchanges made in excess of applicable trading restrictions in designated accounts held by Funds Management or its affiliates that are used exclusively for addressing operational matters related to shareholder accounts, such as testing of account functions, and are maintained at low balances that do not exceed specified dollar amount limitations.

A financial intermediary through whom you may purchase shares of a Fund may independently attempt to identify excessive trading and take steps to deter such activity. As a result, a financial intermediary may on its own limit or permit trading activity of its customers who invest in Fund shares using standards different from the standards used by Funds Management and described in this Prospectus. Funds Management may permit a financial intermediary to enforce its own internal policies and procedures concerning frequent trading in instances where Funds Management reasonably believes that the intermediary's policies and procedures effectively discourage disruptive trading activity. If you purchase Fund shares through a financial intermediary, you should contact the intermediary for more information about the restrictions or limitations on trading activity that will be applied to your account.

Account Policies

Automatic Plans

These plans help you conveniently purchase and/or redeem shares each month. Once you select a plan, tell us the day of the month you would like the transaction to occur. If you do not specify a date, we will process the transaction on or about the 25th day of the month. Call Investor Services at 1-800-222-8222 for more information.

- **Automatic Investment Plan** —With this plan, you can regularly purchase shares of a *Wells Fargo Advantage Fund* with money automatically transferred from a linked bank account.
- **Automatic Exchange Plan** —With this plan, you can regularly exchange shares of a *Wells Fargo Advantage Fund* you own for shares of another *Wells Fargo Advantage Fund*. See the "How to Exchange Shares" section of this Prospectus for the conditions that apply to your shares. In addition, each transaction in an Automatic Exchange Plan must be for a minimum of \$100. This feature may not be available for certain types of accounts.
- **Systematic Withdrawal Plan** —With this plan, you can regularly redeem shares and receive the proceeds by check or by transfer to a linked bank account. To participate in this plan, you:
 - must have a Fund account valued at \$10,000 or more;
 - must request a minimum redemption of \$100;
 - must have your distributions reinvested; and
 - may not simultaneously participate in the Automatic Investment Plan, unless your account is a Money Market Fund or an Ultra Short-Term Bond Fund (Ultra Short-Term Income Fund or Ultra Short-Term Municipal Income Fund).
- **Payroll Direct Deposit** —With this plan, you may transfer all or a portion of your paycheck, social security check, military allotment, or annuity payment for investment into the Fund of your choice.

It generally takes about ten business days to establish a plan once we have received your instructions. It generally takes about five business days to change or cancel participation in a plan. We may automatically cancel your plan if the linked bank account you specified is closed, or for other reasons.

Householding

To help keep Fund expenses low, a single copy of a prospectus or shareholder report may be sent to shareholders of the same household. If your household currently receives a single copy of a prospectus or shareholder report and you would prefer to receive multiple copies, please contact your financial intermediary.

Retirement Accounts

We offer prototype documents for a variety of retirement accounts for individuals and small businesses. Please call 1-800-222-8222 for information on:

- Individual Retirement Plans, including Traditional IRAs and Roth IRAs.
- Qualified Retirement Plans, including Simple IRAs, SEP IRAs, Keoghs, Pension Plans, Profit-Sharing Plans, and 401(k) Plans.

There may be special distribution requirements for a retirement account, such as required distributions or mandatory Federal income tax withholdings. For more information, call the number listed above. You may be charged a \$10 annual account maintenance fee for each retirement account up to a maximum of \$30 annually and a \$25 fee for transferring assets to another custodian or for closing a retirement account. Fees charged by institutions may vary.

Small Account Redemptions

We reserve the right to redeem certain accounts that fall below the minimum initial investment amount as the result of shareholder redemptions (as opposed to market movement). Before doing so, we will give you approximately 60 days to bring your account above the minimum investment amount. Please call Investor Services at 1-800-222-8222 or contact your selling agent for further details.

Statements and Confirmations

Statements summarizing activity in your account are mailed quarterly. Confirmations are mailed following each purchase, sale, exchange, or transfer of Fund shares, except generally for Automatic Investment Plan transactions, Systematic Withdrawal Plan transactions using Electronic Funds Transfer, and purchases of new shares through the automatic reinvestment of distributions. Upon your request and for the applicable fee, you may obtain a reprint of an account statement. Please call Investor Services at 1-800-222-8222 for more information.

Electronic Delivery of Fund Documents

You may elect to receive your Fund prospectuses, shareholder reports and other Fund documents electronically in lieu of

paper form by enrolling on the Fund's Web site at wellsfargo.com/advantagedelivery. If you make this election, you will be notified by e-mail when the most recent Fund documents are available for electronic viewing and downloading.

To receive Fund documents electronically, you must have an e-mail account and an internet browser that meets the requirements described in the Privacy & Security section of the Fund's Web site at wellsfargoadvantagefunds.com. You may change your electronic delivery preferences or revoke your election to receive Fund documents electronically at any time by visiting wellsfargo.com/advantagedelivery.

Statement Inquiries

Contact us in writing regarding any errors or discrepancies noted on your account statement within 60 days after the date of the statement confirming a transaction. We may deny your ability to refute a transaction if we do not hear from you within those 60 days.

Transaction Authorizations

Telephone, electronic, and clearing agency privileges allow us to accept transaction instructions by anyone representing themselves as the shareholder and who provides reasonable confirmation of their identity. Neither we nor *Wells Fargo Advantage Funds* will be liable for any losses incurred if we follow such instructions we reasonably believe to be genuine. For transactions through the automated phone system and our Web site, we will assign personal identification numbers (PINs) and/or passwords to help protect your account information. To safeguard your account, please keep your PINs and passwords confidential. Contact us immediately if you believe there is a discrepancy on your confirmation statement or if you believe someone has obtained unauthorized access to your account, PIN or password.

USA PATRIOT Act

In compliance with the USA PATRIOT Act, all financial institutions (including mutual funds) at the time an account is opened, are required to obtain, verify and record the following information for all registered owners or others who may be authorized to act on the account: full name, date of birth, taxpayer identification number (usually your Social Security Number), and permanent street address. Corporate, trust and other entity accounts require additional documentation. This information will be used to verify your identity. We will return your application if any of this information is missing, and we may request additional information from you for verification purposes. In the rare event that we are unable to verify your identity, we reserve the right to redeem your account at the current day's NAV. You will be responsible for any losses, taxes, expenses, fees, or other results of such a redemption.

Distributions

The Funds generally make distributions of any net investment income and any realized net capital gains at least annually. Please note, distributions have the effect of reducing the NAV per share by the amount distributed.

We offer the following distribution options. To change your current option for payment of distributions, please call 1-800-222-8222.

- **Automatic Reinvestment Option**—Allows you to buy new shares of the same class of the Fund that generated the distributions. The new shares are purchased at NAV generally on the day the distribution is paid. This option is automatically assigned to your account unless you specify another option.
- **Check Payment Option**—Allows you to have checks for distributions mailed to your address of record or to another name and address which you have specified in written instructions. A medallion guarantee may also be required. If checks remain uncashed for six months or are undeliverable by the Post Office, we will reinvest the distributions at the earliest date possible, and future distributions will be automatically reinvested.
- **Bank Account Payment Option**—Allows you to receive distributions directly in a checking or savings account through Electronic Funds Transfer. The bank account must be linked to your Wells Fargo Advantage Fund account. In order to establish a new linked bank account, you must send a written, medallion guaranteed instruction along with a copy of a voided check or deposit slip. Any distribution returned to us due to an invalid banking instruction will be sent to your address of record by check at the earliest date possible, and future distributions will be automatically reinvested.
- **Directed Distribution Purchase Option**—Allows you to buy shares of a different Wells Fargo Advantage Fund of the same share class. The new shares are purchased at NAV generally on the day the distribution is paid. In order to establish this option, you need to identify the Fund and account the distributions are coming from, and the Fund and account to which the distributions are being directed. You must meet any required minimum purchases in both Funds prior to establishing this option.

Taxes

The following discussion regarding federal income taxes is based on laws that were in effect as of the date of this Prospectus and summarizes only some of the important federal income tax considerations affecting a Fund and you as a shareholder. It does not apply to foreign or tax-exempt shareholders or those holding Fund shares through a tax-advantaged account, such as a 401(k) Plan or IRA. This discussion is not intended as a substitute for careful tax planning. You should consult your tax adviser about your specific tax situation. Please see the Statement of Additional Information for additional federal income tax information.

We will pass on to a Fund's shareholders substantially all of the Fund's net investment income and realized net capital gains, if any. Distributions from a Fund's ordinary income and net short-term capital gain, if any, generally will be taxable to you as ordinary income. Distributions from a Fund's net long-term capital gain, if any, generally will be taxable to you as long-term capital gain.

Corporate shareholders may be able to deduct a portion of their distributions when determining their taxable income.

An individual's net long-term capital gain is subject to a reduced, maximum 15% rate of tax. Also, if you are an individual Fund shareholder, the portion of your distributions attributable to dividends received by a Fund from its investments in certain U.S. and foreign corporations generally will be taxed at a maximum 15% rate of tax, as long as certain holding period requirements are met. Maximum long-term capital gain income tax rates are scheduled to rise to 20% in 2013, 18% for assets held more than 5 years. Due to recent legislation, beginning in 2013, for U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly), a new 3.8% Medicare contribution tax will apply on "net investment income," including interest, dividends, and capital gains.

Distributions from a Fund normally will be taxable to you when paid, whether you take distributions in cash or automatically reinvest them in additional Fund shares. Following the end of each year, we will notify you of the federal income tax status of your distributions for the year.

If you buy shares of a Fund shortly before it makes a taxable distribution, your distribution will, in effect, be a taxable return of part of your investment. Similarly, if you buy shares of a Fund when it holds appreciated securities, you will receive a taxable return of part of your investment if and when the Fund sells the appreciated securities and distributes the gain. The Fund has built up, or has the potential to build up, high levels of unrealized appreciation.

Your redemptions (including redemptions in-kind) and exchanges of Fund shares ordinarily will result in a taxable capital gain or loss, depending on the amount you receive for your shares (or are deemed to receive in the case of exchanges) and the amount you paid (or are deemed to have paid) for them. Such capital gain or loss generally will be long-term capital gain or loss if you have held your redeemed or exchanged Fund shares for more than one year at the time of redemption or exchange. In certain circumstances, losses realized on the redemption or exchange of Fund shares may be disallowed.

In certain circumstances, Fund shareholders may be subject to backup withholding taxes.

Additional Expense and Performance Information

This section contains additional information regarding the expenses and performance of the Funds. The sub-section below titled "Additional Expense Information" provides further information regarding a Fund's Annual Fund Operating Expenses. The sub-section below titled "Index Descriptions" defines the market indices that are referenced in the Fund Summaries. The sub-section below titled "Share Class Performance" provides history for specified share classes of certain Funds.

Additional Expense Information

Funds Management has contractually committed for a period of time to waive and/or reimburse Fund expenses that exceed a certain specified amount, as set forth in a footnote to each Fund's Annual Fund Operating Expenses table. This contractual expense cap excludes certain expenses that a Fund may incur, such as brokerage commissions, interest, taxes, the expenses of any money market fund or other fund held by a Fund (i.e., acquired fund fees and expenses) and extraordinary expenses. Funds Management will not reimburse a Fund for these types of expenses, even if they cause the Fund's Total Annual Fund Operating Expenses to exceed the amount of the expense cap.

Index Descriptions

The "Average Annual Total Returns" table in each Fund's Fund Summary compares the Fund's returns with those of at least one broad-based market index. Below are descriptions of each such index. You cannot invest directly in an index.

Russell 2000[®] Growth Index	The Russell 2000 [®] Growth Index measures the performance of those Russell 2000 [®] companies with higher price-to-book ratios and higher forecasted growth values.
Russell 2000[®] Value Index	The Russell 2000 [®] Value Index measures the performance of those Russell 2000 [®] companies with lower price-to-book ratios and lower forecasted growth values.
Russell 2500[™] Value Index	The Russell 2500 [™] Value Index measures the performance of those Russell 2500 [™] companies with lower price-to-book ratios and lower forecasted growth values.

Share Class Performance

The following provides additional information about the performance history of the Funds contained in this prospectus, including the inception date of the relevant share class, information regarding predecessor funds, if any, and whether performance information presented is based on the history of an older share class.

- **Intrinsic Small Cap Value Fund** - Metropolitan West Capital Management replaced Wells Capital Management as a sub-advisor for the Fund effective June 1, 2010. Accordingly, performance figures shown prior to June 1, 2010 do not reflect the principal investment strategies or performance of Metropolitan West Capital Management. Historical performance shown for Class A prior to their inception reflects the performance of the Investor Class shares, and includes the higher expenses applicable to the Investor Class shares. If these expenses had not been included, returns would be higher. Historical performance shown for Class C prior to their inception reflects the performance of the Investor Class shares, adjusted to reflect the higher expenses applicable to Class C shares.
- **Small/Mid Cap Value Fund** - Historical performance shown for Class A prior to their inception reflects the performance of the Investor Class shares, and includes the higher expenses applicable to the Investor Class shares. If these expenses had not been included, returns would be higher. Historical performance shown for Class C prior to their inception reflects the performance of the Investor Class shares, adjusted to reflect the higher expenses applicable to Class C shares.
- **Special Small Cap Value Fund** - Historical performance shown for all classes of the Fund prior to July 19, 2010 is based on the performance of the fund's predecessor, Evergreen Special Values Fund.
- **Traditional Small Cap Growth Fund** - Historical performance shown for Class C prior to their inception reflects the performance of Class A shares, and is adjusted to reflect the higher expenses applicable to Class C shares. Historical performance shown for all classes of the Fund prior to July 19, 2010 is based on the performance of the fund's predecessor, Evergreen Growth Fund.

A Fund's past performance is no guarantee of future results. A Fund's investment results will fluctuate over time, and any representation of the Fund's returns for any past period should not be considered as a representation of what a Fund's returns may be in any future period. Each Fund's annual and semi-annual reports contain additional performance information and are available upon request, without charge, by calling the telephone number listed on the back cover page of this Prospectus.

Financial Highlights

The following tables are intended to help you understand each Fund's financial performance for the past 5 years (or for the life of a Fund, if shorter). Certain information reflects financial results for a single Fund share. Total returns represent the rate you would have earned (or lost) on an investment in each Fund (assuming reinvestment of all distributions). An independent registered public accounting firm has audited the information for each period. The information, along with the report of an independent registered public accounting firm and each Fund's financial statements, is also contained in each Fund's annual report, which is available upon request.
