# Common Stock Fund Summary

Class/Ticker: Investor Class - STCSX

Summary Prospectus | February 1, 2014

[Link to Prospectus](#)

[Link to SAI](#)

*Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at [wellsfargoadvantagefunds.com/reports](http://wellsfargoadvantagefunds.com/reports). You can also get information at no cost by calling 1-800-222-8222, or by sending an email request to [wfaf@wellsfargo.com](mailto:wfaf@wellsfargo.com). The current prospectus ("Prospectus") and statement of additional information ("SAI") dated February 1, 2014 are incorporated by reference into this summary prospectus. The Fund's SAI may be obtained, free of charge, in the same manner as the Prospectus.*

## Investment Objective

The Fund seeks long-term capital appreciation.

## Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy and hold shares of the Fund.

### Shareholder Fees (fees paid directly from your investment)

Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	None
Maximum deferred sales charge (load) (as a percentage of offering price)	None

### Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.71%
Distribution (12b-1) Fees	0.00%
Other Expenses	0.65%
Acquired Fund Fees and Expenses	0.02%
<b>Total Annual Fund Operating Expenses</b>	<b>1.38%</b>
Fee Waivers	0.07%
<b>Total Annual Fund Operating Expenses After Fee Waiver<sup>1</sup></b>	<b>1.31%</b>

1. The Adviser has committed through January 31, 2015, to waive fees and/or reimburse expenses to the extent necessary to cap the Fund's Total Annual Fund Operating Expenses After Fee Waiver at 1.29% for Investor Class. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses, and extraordinary expenses are excluded from the cap. After this time, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

## Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other mutual funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that operating expenses remain the same as in the tables above. The example also assumes that the Total Annual Fund Operating Expenses After Fee Waiver shown above will only be in place for the length of the current waiver commitment. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

After:	
1 Year	\$133
3 Years	\$430
5 Years	\$749
10 Years	\$1,651

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 40% of the average value of its portfolio.

## Principal Investment Strategies

Under normal circumstances, we invest:

- at least 80% of the Fund's net assets in common stocks; and
- up to 25% of the Fund's total assets in equity securities of foreign issuers, including ADRs and similar investments.

We invest principally in common stocks of small-and medium-capitalization foreign and domestic companies, which we define as those with market capitalizations falling within the ranges of the Russell 2000® Index and the Russell Midcap® Index at the time of purchase. The ranges of the Russell 2000® Index and the Russell Midcap® Index were approximately \$3.5 million to \$5.3 billion and \$737.7 million to \$32.0 billion, respectively, as of December 31, 2013, and are expected to change frequently.

We invest principally in common stocks of small-and medium-capitalization companies that we believe are underpriced yet have attractive growth prospects. Our analysis is based on the determination of a company's "private market price," which is the price an investor would be willing to pay for the entire company. We determine a company's private market price based upon several different types of analysis. We carry out a fundamental analysis of a company's cash flows, asset valuations, competitive factors, and other industry specific factors. We also gauge the company's management strength, financial health, and growth potential in determining a company's private market price. We place an emphasis on company management, even meeting with management in certain situations. Finally, we focus on the long-term strategic direction of the company. We then compare the private market price as determined by these factors to the company's public market capitalization, and invest in the securities of those companies where we believe there is a significant gap between the two.

We may sell an investment when its price no longer compares favorably with the company's private market price. In addition, we may choose to sell an investment where the fundamentals deteriorate or the strategy of the management or the management itself changes.

## Principal Investment Risks

An investment in the Fund may lose money, is not a deposit of Wells Fargo Bank, N.A. or its affiliates, is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and is primarily subject to the risks briefly summarized below.

**Foreign Investment Risk.** Foreign investments face the potential of heightened illiquidity, greater price volatility and adverse effects of political, regulatory, tax, currency, economic or other macroeconomic developments.

**Growth Style Investment Risk.** Growth stocks may be more expensive relative to the values of other stocks and carry potential for significant volatility and loss.

**Issuer Risk.** The value of a security may decline because of adverse events or circumstances that directly relate to conditions at the issuer or any entity providing it credit or liquidity support.

**Liquidity Risk.** A security may not be able to be sold at the time desired or without adversely affecting the price.

**Management Risk.** Investment decisions made by a Fund's adviser in seeking to achieve the Fund's investment objective may not produce the returns expected by the adviser, may cause the securities held by the Fund and, in turn, the Fund's shares, to lose value or may cause the Fund to underperform other funds with similar investment objectives.

**Market Risk.** The market price of securities owned by the Fund may rapidly or unpredictably decline due to factors affecting securities markets generally or particular industries.

**Regulatory Risk.** Changes in government regulations may adversely affect the value of a security. An insufficiently regulated industry or market might also permit inappropriate practices that adversely affect an investment.

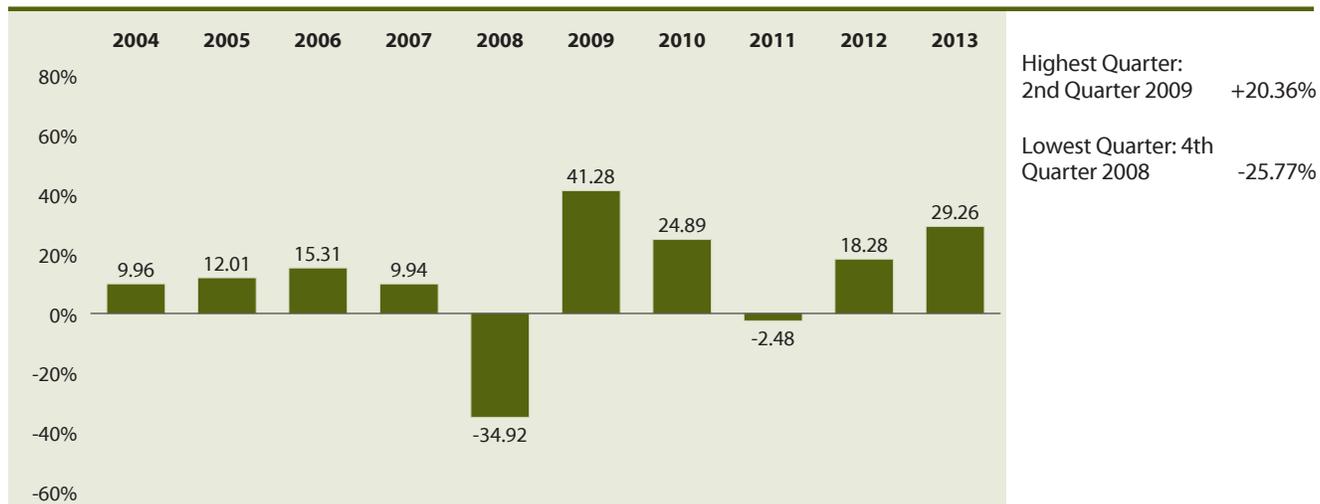

**Smaller Company Securities Risk.** Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than larger company stocks.

**Value Style Investment Risk.** Value stocks may lose value and may be subject to prolonged depressed valuations.

## Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of one or more indices. Past performance before and after taxes is no guarantee of future results. Current month-end performance is available on the Fund's Web site at [wellsfargoadvantagefunds.com](http://wellsfargoadvantagefunds.com).

### Calendar Year Total Returns as of 12/31 each year Investor Class

### Average Annual Total Returns for the periods ended 12/31/2013

	Inception Date of Share Class	1 Year	5 Year	10 Year
Investor Class (before taxes)	12/29/1989	29.26%	21.35%	10.33%
Investor Class (after taxes on distributions)	12/29/1989	26.77%	20.30%	8.71%
Investor Class (after taxes on distributions and the sale of Fund Shares)	12/29/1989	18.39%	17.53%	8.32%
Russell 2500® Index (reflects no deduction for fees, expenses, or taxes)		36.80%	21.77%	9.81%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state, local or foreign taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to tax-exempt investors or investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) Plans or Individual Retirement Accounts.

## Tax Information

Any distributions you receive from the Fund may be taxable as ordinary income or capital gains, except when your investment is in an IRA, 401(k) or other tax advantaged investment plan. However, subsequent withdrawals from such a tax advantaged investment plan may be subject to federal income tax. You should consult your tax adviser about your specific tax situation.

## Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase a Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Consult your salesperson or visit your financial intermediary's Web site for more information.
