# Diversified International Fund Summary

Class/Ticker: Administrator Class: WFIEX

Summary Prospectus | March 1, 2014

[Link to Prospectus](#)

[Link to SAI](#)

*Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at [wellsfargoadvantagefunds.com/reports](http://wellsfargoadvantagefunds.com/reports). You can also get information at no cost by calling 1-800-222-8222, or by sending an email request to [wfaf@wellsfargo.com](mailto:wfaf@wellsfargo.com). The current prospectus ("Prospectus"), dated March 1, 2014, and statement of additional information ("SAI"), dated March 1, 2014, are incorporated by reference into this summary prospectus. The Fund's SAI may be obtained, free of charge, in the same manner as the Prospectus.*

## Investment Objective

The Fund seeks long-term capital appreciation.

## Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy and hold shares of the Fund.

### Shareholder Fees (fees paid directly from your investment)

Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	None
Maximum deferred sales charge (load) (as a percentage of offering price)	None

### Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)<sup>1</sup>

Management Fees	0.85%
Distribution (12b-1) Fees	0.00%
Other Expenses	0.91%
Acquired Fund Fees and Expenses	0.01%
<b>Total Annual Fund Operating Expenses</b>	<b>1.77%</b>
Fee Waivers	0.51%
<b>Total Annual Fund Operating Expenses After Fee Waiver<sup>2</sup></b>	<b>1.26%</b>

- Expenses have been adjusted as necessary from amounts incurred during the Fund's most recent fiscal year to reflect current fees and expenses.
- The Adviser has committed through February 28, 2015, to waive fees and/or reimburse expenses to the extent necessary to cap the Fund's Total Annual Fund Operating Expenses After Fee Waiver at 1.25% for Administrator Class. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses, and extraordinary expenses are excluded from the cap. After this time, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

## Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other mutual funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that operating expenses remain the same as in the tables above. The example also assumes that the Total Annual Fund Operating Expenses After Fee Waiver shown above will only be in place for the length of the current waiver commitment. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

After:	
1 Year	\$128
3 Years	\$508
5 Years	\$912
10 Years	\$2,042

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 40% of the average value of its portfolio.

## Principal Investment Strategies

Under normal circumstances, we invest:

- at least 80% of the Fund's net assets in equity securities of foreign issuers, and
- up to 20% of the Fund's total assets in emerging market equity securities.

We invest principally in the equity securities of foreign issuers through the use of three different styles of international equity management: an international growth style, sub-advised by Artisan Partners Limited Partnership; an international value style, sub-advised by LSV Asset Management; and an international blend style, sub-advised by Wells Capital Management Incorporated. We invest primarily in developed countries, but may invest in emerging market countries and may invest in equity securities of any market capitalization. Furthermore, we may use futures, options or participation notes to manage risk or to enhance return. We reserve the right to hedge the portfolio's foreign currency exposure by purchasing or selling currency futures and foreign currency forward contracts. However, under normal circumstances, we will not engage in extensive foreign currency hedging.

### Artisan Partners Limited Partnership (Artisan)

Artisan employs a fundamental stock selection process to identify long-term growth opportunities to build a portfolio of non-U.S. growth companies of any market capitalization. Artisan seeks to invest in companies within its preferred themes with sustainable growth characteristics at attractive valuations that do not fully reflect their long-term potential. Artisan may sell a stock when Artisan thinks the stock is approaching full valuation, the company exhibits deteriorating fundamentals, changing circumstances affect the original reasons for its purchase, or more attractive opportunities are identified.

### LSV Asset Management (LSV)

LSV invests in equity securities of foreign issuers which it believes are undervalued in the marketplace at the time of purchase and show recent positive signals, such as an appreciation in prices and increase in earnings. LSV believes that these securities have the potential to produce future returns if their future growth exceeds the market's low expectations. LSV uses a quantitative investment model to make investment decisions for the Fund. The investment model ranks securities based on fundamental measures of value (such as the dividend yield) and indicators of near-term recovery (such as recent price appreciation). A stock is typically sold if the model indicates a decline in its ranking or if a stock's relative portfolio weight has appreciated significantly (relative to the Fund's benchmark).

### Wells Capital Management Incorporated (Wells Capital Management)

Wells Capital Management invests in equity securities of foreign issuers by using bottom-up stock selection, based on in-depth fundamental research as the cornerstone of its investment process. During each stage of the process, Wells Capital Management also considers the influence on the investment theses of top-down factors such as macroeconomic forecasts, real economic growth prospects, fiscal and monetary policy, currency issues, and demographic and political risks. The investment process seeks both growth and value opportunities. For growth investments, Wells Capital Management targets companies that it believes have strong business franchises, experienced and proven management, and accelerating cash flow growth rates. For value investments, Wells Capital Management targets companies that it believes are undervalued in the marketplace compared to their intrinsic value. Wells Capital Management may purchase securities across any market capitalization. Wells Capital Management may sell a stock if it achieves its investment objective for the position, if a stock's fundamentals or price change significantly, if it changes its view of a country or sector, or if the stock no longer fits within the risk characteristics of the Fund's portfolio.

## Principal Investment Risks

An investment in the Fund may lose money, is not a deposit of Wells Fargo Bank, N.A. or its affiliates, is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and is primarily subject to the risks briefly summarized below.

**Counter-Party Risk.** A Fund may incur a loss if the other party to an investment contract, such as a derivative or a repurchase or reverse repurchase agreement, fails to fulfill its contractual obligation to the Fund.

**Derivatives Risk.** The use of derivatives such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than offset risk.

**Emerging Markets Risk.** Foreign investment risks are typically greater for securities in emerging markets, which can be more vulnerable to recessions, currency volatility, inflation and market failure.

**Foreign Currency Transactions Risk.** Foreign securities are often denominated in foreign currencies. As a result, the value of a Fund's shares is affected by changes in exchange rates. Use of hedging techniques cannot protect against exchange rate risk perfectly. If the Fund's adviser is incorrect in its judgment of future exchange rate relationships, the Fund could be in a less advantageous position than if such a hedge had not been established.

**Foreign Investment Risk.** Foreign investments face the potential of heightened illiquidity, greater price volatility and adverse effects of political, regulatory, tax, currency, economic or other macroeconomic developments.

**Futures Risk.** Because the futures utilized by a Fund are standardized and exchange-traded, where the exchange serves as the ultimate counterparty for all contracts, the primary credit risk on futures contracts is the creditworthiness of the exchange itself. Futures are also subject to market risk, interest rate risk (in the case of futures contracts relating to income producing securities) and index tracking risk (in the case of stock index futures).

**Growth Style Investment Risk.** Growth stocks may be more expensive relative to the values of other stocks and carry potential for significant volatility and loss.

**Issuer Risk.** The value of a security may decline because of adverse events or circumstances that directly relate to conditions at the issuer or any entity providing it credit or liquidity support.

**Larger Company Securities Risk.** Securities of companies with larger market capitalizations may underperform securities of companies with smaller and mid-sized market capitalizations in certain economic environments.

**Leverage Risk.** Leverage created by borrowing or certain investments, such as derivatives and reverse repurchase agreements, can diminish the Fund's performance and increase the volatility of the Fund's net asset value.

**Liquidity Risk.** A security may not be able to be sold at the time desired or without adversely affecting the price.

**Management Risk.** Investment decisions made by a Fund's adviser in seeking to achieve the Fund's investment objective may not produce the returns expected by the adviser, may cause the securities held by the Fund and, in turn, the Fund's shares, to lose value or may cause the Fund to underperform other funds with similar investment objectives.

**Market Risk.** The market price of securities owned by the Fund may rapidly or unpredictably decline due to factors affecting securities markets generally or particular industries.

**Multi-Style Management Risk.** The management of the Fund's portfolio using different investment styles can result in higher transaction costs and lower tax efficiency than other funds which adhere to a single investment style.

**Options Risk.** An investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves. A Fund that purchases options is subject to the risk of a complete loss of premiums, while a Fund that writes options could be in a worse position than it would have been had it not written the option. There can be no assurance that a liquid market will exist when a Fund seeks to close out an option position.

**Participation Notes Risk.** Investments in participation notes involve the same risks associated with a direct investment in the securities of the underlying foreign companies or foreign securities markets that they seek to replicate. The performance results of participation notes will not replicate exactly the performance of the securities of the foreign companies or foreign securities markets that they seek to replicate due to various factors, including transaction and other expenses.

**Regulatory Risk.** Changes in government regulations may adversely affect the value of a security. An insufficiently regulated industry or market might also permit inappropriate practices that adversely affect an investment.

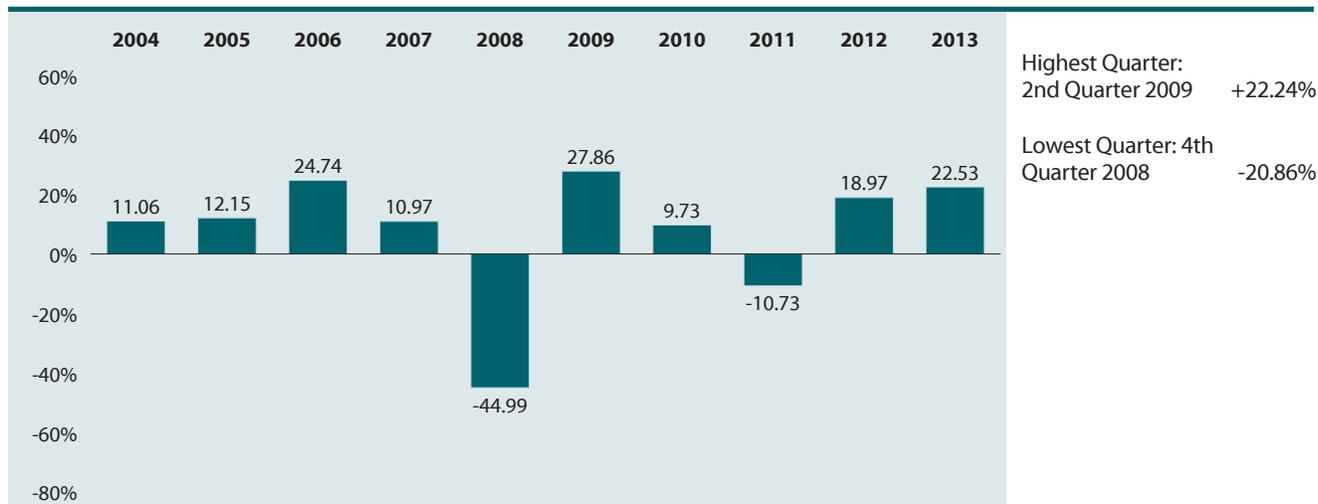

**Smaller Company Securities Risk.** Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than larger company stocks.

**Value Style Investment Risk.** Value stocks may lose value and may be subject to prolonged depressed valuations.

## Performance

The following information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The Fund's average annual total returns are compared to the performance of one or more indices. Past performance before and after taxes is no guarantee of future results. Current month-end performance is available on the Fund's Web site at [wellsfargoadvantagemfunds.com](http://wellsfargoadvantagemfunds.com).

### Calendar Year Total Returns as of 12/31 each year Administrator Class

### Average Annual Total Returns for the periods ended 12/31/2013

	Inception Date of Share Class	1 Year	5 Year	10 Year
Administrator Class (before taxes)	11/8/1999	22.53%	12.79%	5.64%
Administrator Class (after taxes on distributions)	11/8/1999	21.72%	12.30%	4.89%
Administrator Class (after taxes on distributions and the sale of Fund Shares)	11/8/1999	12.75%	10.20%	4.62%
MSCI EAFE Index (Net) (reflects no deduction for fees, expenses, or taxes)		22.78%	12.44%	6.91%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state, local or foreign taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to tax-exempt investors or investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) Plans or Individual Retirement Accounts.

	LSV Asset Management	<b>Josef Lakonishok</b> , Portfolio Manager/2004 <b>Puneet Mansharamani, CFA</b> , Portfolio Manager/2006 <b>Menno Vermeulen, CFA</b> , Portfolio Manager/2004
	Wells Capital Management Incorporated	<b>Jeffrey Everett, CFA</b> , Portfolio Manager/2012 <b>Dale Winner, CFA</b> , Portfolio Manager/2012

## Purchase and Sale of Fund Shares

Administrator Class shares are generally available through financial intermediaries for the accounts of their customers and directly to institutional investors and individuals. Institutional investors may include corporations; private banks and trust companies; endowments and foundations; defined contribution, defined benefit and other employer sponsored retirement plans; institutional retirement plan platforms; insurance companies; registered investment advisor firms; bank trusts; 529 college savings plans; family offices; and fund of funds including those managed by Funds Management. In general, you can buy or sell shares of the Fund by mail, internet, phone or wire on any day the New York Stock Exchange is open for regular trading. You also may buy and sell shares through a financial professional.

Minimum Investments	To Buy or Sell Shares
<p><b>Minimum Initial Investment</b> Administrator Class: \$1 million (this amount may be reduced or eliminated for certain eligible investors)</p> <p><b>Minimum Additional Investment</b> Administrator Class: None</p>	<p><b>Mail:</b> Wells Fargo Advantage Funds P.O. Box 8266 Boston, MA 02266-8266 <b>Internet:</b> wellsfargoadvantagefunds.com <b>Phone or Wire:</b> 1-800-222-8222</p> <p><b>Contact your investment representative.</b></p>

## Tax Information

Any distributions you receive from the Fund may be taxable as ordinary income or capital gains, except when your investment is in an IRA, 401(k) or other tax advantaged investment plan. However, subsequent withdrawals from such a tax advantaged investment plan may be subject to federal income tax. You should consult your tax adviser about your specific tax situation.

## Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase a Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Consult your salesperson or visit your financial intermediary's Web site for more information.
